The Gendered Atom The Sexual Psychology Of Science:

The Gendered Atom Theodore Roszak,1999-01-01 Identifies a male bias in current scientific inquiry and reveals how this prejudice is affected by our relationship to the natural world [The Gendered Atom](#) Theodore Roszak,Jane Goodall,2006-07 Beneath the scientist s rational objective surface Roszak finds a maelstrom of repressed sexual biases gender stereotypes Far from a purely objective view of the natural world science is suffused with sexual politics And the result is a culture at risk from global warming nuclear proliferation toxic waste genetic engineering more Modern scientists have subjected nature to a typically masculine drive to control exploit Centuries of male domination have distorted not only scientific R D but also our relationship to one another to the natural world Roszak envisions a new gender free science that respects our community with nature promises a healthier more sustainable relationship between ourselves the world we inhabit **Polygendered and Ponytailed** Dayna B. Daniels,2009-06-01 When Cat Crandall ditches her career in advertising to take a job teaching painting workshops in exotic locations she s hoping to be sent to Tuscany or maybe France Instead she s assigned to lead a group of aspiring artists through the backcountry of the isolated Boyd Dude Ranch in Wyoming Mack Boyd is in the middle of the best bronc riding season of his life when his mother asks him to help lead an artists retreat at the ranch Mack might be able to ride a wild stallion to a standstill but he can t say no to his family It doesn t take long for Mack to figure out that artists are a lot harder to herd than cattle especially when they re led by a spitfire of a city girl who doesn t like to be bossed around Cat Crandall is nothing but trouble so why is he so drawn to her

Critical

Communication Theory Sue Curry Jansen,2002-11-19 Critical theorist feminist and censorship expert Sue Curry Jansen brings a fresh perspective to contemporary communication inquiry Jansen engages two key questions at the heart of a critical politics of communication What do we know And how do we know it The questions are not unique to our era she notes but our responses to them are our own Looking at issues of globalization science politics gender social inequality and other social formations that shape our world this insightful book advocates a new agenda not only for communication research but also for the writing_and language_that comes out of it [Women and Science, 17th Century to Present](#) Véronique

Molinari,2011-05-25 If women s interest and participation in the advancement of science has a long history the academic study of their contributions is a far more recent phenomenon to be placed in the wake of second wave feminism in the 1970s and the advent of women s studies which have since then given impetus to research on female figures in specific fields or more generally speaking on women s battles to gain access to knowledge education and recognition in the scientific world These studies while providing a useful insight into the contributions of a few more or less well known figures have mostly focused however on the obstacles that women have had to overcome in the field of education and employment or in their quest for acknowledgement by their male peers The aim of this volume is to try and approach the issue from a different and more comprehensive point of view taking into account not only the position of women in science but also the link between

women and science through the analysis of various kinds of discourse and representation such as the press poetry fiction biographies and autobiographies or professional journals including that of women themselves The questions of the presentation or re presentation of science by women are thus at the core of this study as well as that of the portrayal and self portrayal of women in the sciences whether in the educational or the professional field A final part examines how women are represented in science fiction which like science itself has traditionally been a field dominated by men

Money, Magic, and How to Dismantle a Financial Bomb David Orrell,2022-02-10 Money has many apparently magical properties It can be created out of the void and vanish without so much as a puff of smoke It can flash through space It can grow without limit And it can blow up without warning David Orrell argues that the emerging discipline of quantum economics of which he is at the forefront is the key to shattering the illusions that prevent us from understanding money s true nature In this colourful tour of the history philosophy and mathematics of money Orrell demonstrates how everything makes much more sense when we replace our classical economic models with ones based on quantum probability and reveals the explosive reality of what is left once the illusions are stripped away

What Was Artificial Intelligence? Sue Curry Jansen,2022-04-01 When it was originally published in 2002 Sue Curry Jansen s *What Was Artificial Intelligence* attracted little notice The long essay was published as a chapter in Jansen s *Critical Communication Theory* a book whose wisdom and erudition failed to register across the many fields it addressed One explanation for the neglect ironic and telling is that Jansen s sheer scope as an intellectual had few competent readers in the communication studies discipline into which she published the book *What Was Artificial Intelligence* was buried treasure In this mediastudies press edition Jansen s prescient autopsy of AI self selling the rhetoric of the masculinist sublime is reprinted with a new introduction Now an open access book *What Was Artificial Intelligence* is a message in a bottle addressed to Musk Bezos and the latest generation of AI myth makers

Contemporary Topics in Women's Mental Health Dr Prabha S. Chandra,Dr Helen Herrman,Dr Jane E. Fisher,Dr Marianne Kastrup,Dr Unaiza Niaz,Dr Marta Rondon,Dr Ahmed Okasha,2009-09-24 *Contemporary Topics in Women s Mental Health Global Perspectives in a Changing Society* considers both the mental health and psychiatric disorders of women in relation to global social change The book addresses the current themes in psychiatric disorders among women reproduction and mental health service delivery and ethics impact of violence disasters and migration women s mental health promotion and social policy and concludes each section with a commentary discussing important themes emerging from each chapter Psychiatrists sociologists and students of women s studies will all benefit from this textbook With a Foreword by Sir Michael Marmot Professor of Epidemiology and Public Health University College London Chair Commission on Social Determinants of Health

The Ecologist ,2001 **The Devil and Daniel Silverman** Theodore Roszak,2003 Danny Silverman s first novel reached 10 on the New York Times best seller list but that was 20 years ago Now middle aged he and his partner Martin an African American actor are getting by on the residuals from Martin s cancelled TV cop series when Danny gets an offer he

can't refuse a speaking gig in a Minnesota bible college that will net him a small fortune. Why me? Silverman wonders, but he'll take the money and run. What can happen? Only a record breaking snowstorm that traps him under the same roof as the evangelical Christian faculty who see this Jewish homosexual writer from San Francisco as the incarnation of the anti Christ. Forced to defend all he believes in sexual equality, human rights, same sex marriage, dancing, vodka, coffee. Silverman finds himself on the front lines of the culture wars dividing the nation today. Best known as a social historian, Theodore Roszak is also the author of cult status novels such as *Flicker*, a Hollywood horror satire, and *The Memoirs of Elizabeth Frankenstein*, a sensual retelling of the gothic classic. Here Roszak brings us a hilarious novel of politics and ideas in which the battle for the moral heart of America is waged between a college full of scripture spouting fundamentalists and one gay humanist who thinks they're full of crap.

Economyths David Orrell, 2010. *Economyths* explains how the economy is the result of a complex and unpredictable process, how risk models go astray and why the economy is not rational or fair. It also details how new ideas in mathematics, psychology and environmentalism are helping to reinvent economics.

Supernatural Literature of the World: P-Z S. T. Joshi, Stefan R. Dziemianowicz, 2005. Approximately one thousand alphabetically arranged entries cover authors, themes and works of the nineteenth through twenty first centuries, including Alexander Dumas, Charles Baudelaire, Daphne du Maurier, Katherine Dunn, Shirley Jackson and A.R. Morlan.
