[Colour](#) Peter Tuffrey, 2012-11-15 This rare and evocative collection of color photographs from the 1950s and 60s was chosen from many hundreds of 35 mm color slides taken by veteran railway photographer Bill Reed on and off the East Coast Main Line between London and Aberdeen This was a pivotal moment in the history of locomotion the archetypal steam engine an emblem of Britain's national character was rapidly succumbing to new diesel powered engineering Steam's fading glory is reflected in the grimy condition of many of the locomotives in this collection a number were photographed on the scrap line and the contrast of hulking coal hoppers and water tanks to the comparatively slick new diesels is very apparent But despite the obvious decline of steam locomotion the engines within these pages are still redolent of an age of industrial magnificence Looking back now Bill says he wishes he had taken many more pictures of steam locomotives but thankfully he has taken enough to show us why they will always be cherished in photographs and preserved in museums Paired with Peter Tuffrey's impeccably researched captions this collection of color photographs is a fine tribute to the last days of steam

Knapman, 2025-10-30 We can now celebrate the 200 years anniversary of railways which have served to connect communities across this country and across world countries Our railways started with steam power in 1825 until steam was phased out by British Railways in 1968 Nowadays the preservation movement continues to provide the glorious spectacle of steam trains at work in many parts of the UK The preserved railways and the preserved locomotives running on the main line are making their own history and it is part of this history that is covered by this book which records many of the steam activities from 1986 to 2000 There are numerous locomotives pictured here which may never steam again as the costs of refurbishment coupled with very much stricter safety requirements preclude the reappearance of some old favourites This book contains colour pictures from the author's collection of large format slides and latterly some 35mm slides The style is similar to the author's previous books using approximately of 200 pictures with informative captions to describe the scenes depicted presented in chronological order The enormous work of volunteers in continuing the development of the preservation

movement cannot be underestimated because without those efforts there would be no history to record This book is a further salute to the volunteer movement in recognition of their outstanding achievements     *Search for Steam: British Rail 1951-1962* Charlie Verrall, 2019-04-15 A nostalgic look back on the heyday of steam lavishly illustrated with rare and previously unpublished photographs
