Klaunberg,Félix Martí-Ibáñez,1897 **General Practice Revisited** Ann Cartwright,Robert Anderson,2024-04-01 This study of general practice and the attitudes of patients and general practitioners to it is the most significant book yet written about the NHS This was how the reviewer in the British Medical Journal reviewed Ann Cartwright's earlier book Patients and their Doctors In General Practice Revisited originally published in 1981 Ann Cartwright and Robert Anderson compare the experiences and views described in the first study carried out in 1964 with those revealed by a second survey in 1977 In the intervening period there were a great many changes in the organization of general practice For example appointment systems and nurses working in the surgery became the rule rather than the exception and the number of doctors working in health centres or using deputizing services rose dramatically This study shows how the basic patient doctor relationship has been affected by these changes A fundamental feature of the survey is the demonstration that the attitudes and practices of

patients and doctors are linked and that it is possible to relate the experiences and degree of satisfaction of patients to the doctor's age sex size of practice equipment ancillary help and indeed to the doctor's views and habits By bringing the picture of general practice up to date Ann Cartwright and Robert Anderson provided the basic data for any discussion of primary health care in this country at the time Cumulated Index Medicus,1979 **The Lancet**,1946 **General Practice** Australia. Stevens,1871 *A Textbook of General Practice Second Edition* Patrick White,Ann Wylie,2004-04-30 Aimed at medical students and junior doctors A Textbook of General Practice 2e incorporates the essential information that a student needs to know and understand about general practice and being a general practitioner The learning style of the book is based on experiential and reflective principles in keeping with modern educative theory and practice It addresses changes in the curriculum and provides guidance on practical skills the theory of providing good medicine and the larger considerations of encouraging life

long learning and professional development. This is a relatively new approach in line with the GMCs recommendations and the MRCGP exams. The new edition builds on the successful formula of the first by thoroughly reviewing and revising all content. Self assessment sections have been added to all chapters and a glossary of terms is included at the end of the book. Thinking discussion points have been extended and additional student quotes included.
