Lydia White, 2003-03-06 This authoritative 2003 textbook provides an overview and analysis of current second language acquisition research conducted within the generative linguistic framework Lydia White argues that second language acquisition is constrained by principles and parameters of Universal Grammar The book focuses on characterizing and explaining the underlying linguistic competence of second language learners in terms of these constraints Theories as to the role of Universal Grammar and the extent of mother tongue influence are presented and discussed with particular consideration given to the nature of the interlanguage grammar at different points in development from the initial state to ultimate attainment Throughout the book hypotheses maintaining that second language grammars are constrained by universal principles are contrasted with claims that Universal Grammar is not implicated relevant empirical research is presented from both sides of the debate This textbook is essential reading for those studying second language acquisition from a linguistic perspective **The Development of Second Language Grammars** Elaine C. Schwartz, 1994 This is a collection of essays on the native and non native acquisition of syntax within the Principles and Parameters framework In line with current methodology in the study of adult grammars language acquisition is studied here from a comparative perspective The unifying theme is the issue of the initial state of grammatical knowledge For native language the important controversy is that between the Continuity approach which holds that Universal Grammar is essentially constant throughout development and the Maturation approach which maintains that portions of UG are subject to maturation For non native language the theme of initial states concerns the extent of native grammar influence Different views regarding the continuity question are defended in the papers on first language acquisition Evidence from the acquisition of inter alia Bernese Dutch English Finnish French German Icelandic Italian and Japanese is brought to bear on issues pertaining to clause structure null subjects verb position negation Case marking modality non finite sentences root questions long distance questions and scrambling The views defended on the initial state of adult second language

acquisition also differ from complete L1 influence to different versions of partial L1 influence While the target language is German in these studies the native language varies Korean Spanish and Turkish Analyses invoke UG principles to account for verb placement null subjects verbal morphology and Case marking Though many issues remain the volume highlights the growing ties between formal linguistics and language acquisition research Such an approach provides the foundation for asking the right questions and putting them to empirical test
