## **The Genesis Of Language A Psycholinguistic Approach:**

**The Genesis of Language** George A. Miller, Frank Smith, 1968      The Genesis of Language Frank Smith, George Armitage Miller, 1966      **The Genesis of Language** Frank Smith, George Armitage Miller, 1966-01      The Genesis of Language Frank Smith, 1973      The Genesis of Language : a Psycholinguistic Approach Frank Smith, George Armitage Miller, 1966      The Genesis of Language Frank Smith, George A. Miller, 1973      **The genesis of language : a psycholinguistic approach ; proceedings of a conference on "Language Development in Children" ...** Frank Smith, 1968      The Genesis of Language Frank Smith, George Armitage Miller, 1966      *The Genesis of Language; a Psycholinguistic Approach* George Armitage Miller, Frank Smith, 1966      The Genesis of Language; a Psycholinguistic Approach. Proceedings of a Conference on 'language Development in Children.' Frank Smith (1928- ed), 1966      **The Genesis of Language; a Psycholinguistic Approach; Proceedings of a Conference on Language Development in Children. Edited by Frank Smith and George A. Miller. Third Printing** National Institutes of Health (U.S.). National Institute of Child Health and Human Development. Human Communication Program, George Armitage Miller, Franklyn Leewood SMITH (and MILLER (George Armitage)), 1968      **Proceedings. The Genesis of Language. A Psycholinguistic Approach. Proceedings of a Conference on "Language Development in Children",....** National Institute of Child Health and Human Development. Conference Old Point Comfort, 1966      *The Genesis of Language* Frank Smith, George A. Miller, 1966      *The Genesis of Language a Psycholinguistic Approach* Frank Smith (ed), George A. Miller (ed), 1973      **The Genesis of Language** Frank Smith, George A. Miller, 1971      *The Genesis of Language*, 1970      **The Genesis of Language** Frank Smith, George Armitage Miller, 1966      *Crosslinguistic Approaches to the Psychology of Language* Jiansheng Guo, Elena Lieven, Nancy Budwig, Susan Ervin-Tripp, Keiko Nakamura, Seyda Ozcaliskan, 2010-10-18 This volume covers state of the art research in the field of crosslinguistic approaches to the psychology of language The forty chapters cover a wide range of topics that represent the many research interests of a pioneer Dan Isaac Slobin who has been a major intellectual and creative force in the field of child language development linguistics and psycholinguistics for the past four decades Slobin has insisted on a rigorous crosslinguistic approach in his attempt to identify universal developmental patterns in language learning to explore the effects of particular types of languages on psycholinguistic processes to determine the extent to which universals of language and language behavior are determined by modality vocal auditory vs manual visual and finally to investigate the relation between linguistic and cognitive processes In this volume researchers take up the challenge of the differences between languages to forward research in four major areas with which Slobin has been concerned throughout his career language learning in crosslinguistic perspective spoken and sign languages the integration of language specific factors in narrative skill theoretical issues in typology language development and language change and the relationship between language and cognition All chapters are written by leading researchers currently working in these

fields who are Slobin's colleagues, collaborators or former students in linguistics, psychology, anthropology and cognitive science. Each section starts with an introductory chapter that connects the themes of the chapters and reviews Slobin's contribution in the context of past research trends and future directions. The whole volume focuses squarely on the central argument: universals of human language and of its development are embodied and revealed in its diverse manifestations and utilization. *Crosslinguistic Approaches to the Study of Language* is a key resource for those interested in the range of differences between languages and how this impacts on learning, cognition and language change and a tribute to Dan Slobin's momentous contribution to the field.

**The genesis of language : a psycholinguistic approach ; proceedings of a conference on "Language development in children", sponsored by the National Institute of Child Health and Human Development, National Institutes of Health** Frank Smith, 1971

**The Crosslinguistic Study of Language Acquisition** Dan Isaac Slobin, 2014-03-05

In this final volume in the series, the contributors attempt to expand the contexts in which child language has been examined crosslinguistically. The chapters build on themes that have been touched on, anticipated and promised in earlier volumes in the series. The study of child language has been situated in the disciplines of psychology and linguistics and has been most responsive to dominant issues in those fields, such as nativism and learning, comprehension and production errors, input and universals of morphology and syntax. The context has primarily been that of the individual child interacting with a parent and deciphering the linguistic code. The code has been generally treated in these volumes as a system of morphology and syntax with little attention to phonology and prosody. Attention has been paid occasionally to the facts that the child is acquiring language in a sociocultural setting and that language is used in contexts of semantic and pragmatic communication. In addition, there has been a degree of attention paid to the interactions between language and cognition in the process of development. As for individual differences between children, they have been discussed in those studies where they could not be avoided, but such variation has rarely been the focus of systematic attention. Differences between individual languages have been of great interest, but these differences have not often been placed in a framework of systematic typological variation. And although languages and their grammars change over time, the focus of attention on the individual child learner has generally led to neglect of explanatory principles that are best found on the level of linguistic diachrony rather than the level of innate ideas or patterns of learning and cognition in the individual child. The chapter authors seek to explore these neglected contexts in more depth.
