Not since the founding of The Ghost Club in 1862 and the Society for Psychical Research in 1882 has ghost hunting been so popular. Television and the internet in particular have fueled this new level of interest creating a modern media phenomenon that spans the globe. But while the demand for information is high good information remains scarce. *A Brief Guide to Ghost Hunting* leads us through the process of ghost hunting from initially weighing the first report to choosing equipment and investigating and identifying the phenomena with an analysis of the best places to go looking methods of contacting the spirit world how to explain paranormal activity and crucially how to survive the encounter. However it is also a book about ghost hunting itself drawing on 130 years of research in the cavernous archives of the Society for Psychical Research and even older history to find the earliest ghost stories. *A Ghost Hunting Survey* makes use of interviews with those billing themselves as ghost hunters to find out their views motivations and experiences. New and original research makes use of statistics to map the nebulous world of apparitions while a *Preliminary Survey of Hauntings* offers an analysis of 923 reported phenomena from 263 locations across the UK. This is as far as possible an objective presentation of ghosts and ghost hunting. It is no wonder that mainstream science largely refuses to deal with the subject it is too complicated.
