The Global Age State And Society Beyond Modernity:

The Global Age Martin Albrow, 1997 Taking issue with those who see recent social transformations as an extension of modernity the author contends that social theory must confront an epochal change from the modern era to a new era of globality in which human beings can conceive of forces at work on a global scale and in which they espouse values that take the globe as their reference point The book begins by assessing the problems of writing about modernity showing how narratives of an endlessly self-perpetuating modern age were intrinsic to the modern project the attempt by Enlightenment philosophers to transform the everyday world in accord with science and logic under the auspices of the nation state Now we are beginning to realize that the nation state and the modern project cannot renew themselves endlessly through expansion Instead the author contends the age has culminated in its own dissolution and globality has supplanted modernity as the basis for action and social organization In theorizing the global age he considers the worldwide environmental consequences of aggregate human activities the reconception of human security in the age of nuclear weapons technological advances in communication systems the rise of a global economy and the growing reflexivity of global consciousness as people and groups begin to refer to the globe as the frame for their beliefs The book concludes by examining the consequences of the Global Age thesis for politics identifying a new popular construction of the state that the author terms performative citizenship In the modern age the nation state was the central power and citizens were beneficiaries of that power with rights and duties In the global age citizens respond to the lack of central power by creating or performing the state themselves The global managerial class uses the skills learned in the bureaucracy of the nation state to bring pressure on national governments in the interests of global economic environmental or human rights issues

An Introduction to Global Studies Tuo Cai, Zhenye Liu, 2022-07-30 Since the 1950s globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political economic military environmental and social fortunes of mankind and yet existing theories in humanities and social sciences have been fundamentally built upon the traditional nation state model These two volumes a pioneering work on global studies to be published out of China aims at creating a new theoretical framework against the backdrop of globalization Volume 1 introduces the core concepts and discusses the critical issues of globalization while the editors redefine notions of politics economics law and globality while deploying globalization as a theoretical framework Volume 2 examines the multi level and multi dimensional nature of globalization analysing processes and systems of global society in the light of globalization and exploring the construction of a stable and rational global order These two volumes of global studies are an essential reference for scholars and students in politics economics international relations and law

Identity and Global Politics P. Goff, 2004-03-17 This collected volume draws together essays written by International Relations scholars from a variety of regional methodological and theoretical perspectives to confront the challenges of identity centered analysis In particular the contributors seek to elucidate the general meaning and

methodological implications of the commonly state yet largely unexamined assertion that identities are relational fluid constructed and multiple *Globalisation and Its Discontents* Stan Smith,2006 Unlike most readings of globalisation these essays depict not an irresistible juggernaut but a process that in generating its own resistances opens up the possibility of an alternative world order founded not on the inequalities of power and capital but on shared commitment to a fragile planet and a common and universal culture BOOK JACKET *Global Politics* Ben Whitham,Andrew Heywood,2023-03-31 In turbulent global times your study of this subject is increasingly necessary and urgent Featuring a new chapter on critical theories and revised to take a less Eurocentric approach to concepts and case studies this new edition allows you to tackle global politics important concepts debates and problems How can theories help us to understand the politics of a global pandemic Do we live in a post truth world of fake news and disinformation Does international aid work Does the United States remain a global hegemon What is the Anthropocene and how does it shape global politics Are global politics constrained by a North South divide What are the possible futures of global politics and the politics of outer space Delving into topics as diverse as anarchy intersectionality Confucianism and neoconservatism boxed features give you confidence in political analysis Focus on learn more about the global colour line or the tragedy of the commons Key figures discuss the ideas of Hans Morgenthau Frantz Fanon or bell hooks Debating argue whether the United Nations are obsolete or whether nuclear weapons promote peace Global politics in action apply your learning to the migration crisis in Europe or the Arab Spring Approaches to consider human rights or the Covid 19 pandemic from the perspective of realist liberal postcolonial Marxist feminist constructivist and post structuralist theory Global actors understand the significance of Black Lives Matter Amnesty International or the International Monetary Fund Spanning the development of global politics from the early origins of globalization through to the return of multipolarity in the twenty first century this is an essential text for undergraduates studying global politics and international relations *European Union--the Second Founding* Ludger Kühnhardt,2008 The author is presenting a broadly structured study about the first fifty years of European integration its geopolitical context and academic reflection His study is based on the two fold thesis that since a few years the European Union is going through a process of its Second Founding while simultaneously changing its rationale **Security and Development in Southern Africa** Nana Poku,2001-04-30 With the end of white dominated South Africa many observers have argued for a positive transformation of the whole of Southern Africa based upon market integration and increased cooperation among the states of the region Poku and the contributors to this collection re examine this optimistic scenerio and they point to the problems of translating good intentions into actual policies In reality the economic imbalance between South Africa and its neighbors poses severe problems for the region Far from finding a stronger ally in regional reconstruction and development the countries in the region are finding that for many in South Africa they simply do not matter that much The analysis points to greater polarization which may imply greater marginalization of the poorer countries in the region Moreover a major

widening of the gap between the richer South Africa and some or all of the weaker economies may lead to increased tensions and breakdown of regional relations even to a situation detrimental to economic development in the region A provocative analysis by some of the leading politico economic thinkers of the region the volume will be of great use to scholars researchers and policy makers involved with Southern African development **Major Problems in American History**
