The Global Predicament David W. Orr, Marvin S. Soroos, 1979 *Global Predicament Ecological Perspectives on World Order* *The Coming World Order* Georgii Khosroevich Shakhnazarov, 1984 *Palgrave Advances in International Environmental Politics* M. Betsill, K. Hochstetler, D. Stevis, 2005-10-31 *Palgrave Advances in International Environmental Politics* provides a state of the art review of the major theoretical approaches and substantive debates of the field. The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study. The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates. Case studies in each chapter illuminate the main theoretical questions that emerge from the review.

The Globalization of Environmental Crisis Jan Oosthoek, Barry K. Gills, 2013-10-31 Previously published as a special issue of *Globalizations* this collection of essays addresses what is arguably the most pressing and urgent issue of our day the continuing development of global environmental crises and the need for new and urgent responses to them by the world community. The contributors include social scientists environmental historians anthropologists and science policy researchers and together they give an overview of the history of the globalization of environmental crisis over the past several decades both in terms of the science of measurement and the types of policy and public responses that have emerged to date. The specific issue areas addressed in the book cover a wide range of topics including international environmental governance North South inequalities climate change global warming tropical forests air pollution economic and paradigm shifts sustainability indigenous peoples and eco conservation EU environmental policy the United States and politicized climate science and more. *The Globalization of Environmental Crisis* will be of particular interest to all those concerned with the on going debate over the state of the global environment and what to do about it.

Environmental Activism and World Civic Politics Paul Wapner, 1996-01-04 A theoretical study of the politics of transnational environmental activist groups such as Greenpeace Friends of the Earth and the World Wildlife Fund that argues that environmental activists practice world civic politics and play a central role in the way the world addresses environmental issues.

Frontiers in International Environmental Law: Oceans and Climate Challenges Richard Barnes, Ronán Long, 2021-03-15 *Frontiers in International Environmental Law* explores how law and legal scholarship has responded to some of the most important oceans and climate governance challenges of our time. Using the concept of the frontier each contributor provides a unique perspective on the way that we can understand and can shape the development of law and legal institutions to better protect our marine environment and climate system and reduce conflicts in areas of legal uncertainty. The authors show how different actors influence legal development and how legal transitions occur in marine spaces and how change influences existing legal regimes. They also consider how change creates risks for the protection of vulnerable environment but also opportunities for creative thinking and better ways of governing our
