The Golden Calf Dodo Press:

Gothic Remains Laurence Talairach, 2019-10-01 This book aims to tackle the relationship between literature and the Gothic and anatomical culture in depth research which has not been undertaken in great detail before Gothic Remains provides close readings of Gothic texts and the issue of dissection not previously done. This study although dealing with death, corpses and the Gothic like other studies offers a new analysis on the history of medicine and the part played by anatomy in medical education and practice.

Rapture for the Geeks Richard Dooling, 2008-10-07 Will the Geeks inherit the earth? If computers become twice as fast and twice as capable every two years, how long is it before they're as intelligent as humans? More intelligent? And then in two more years, twice as intelligent? How long before you won't be able to tell if you are texting a person or an especially ingenious chatterbot program designed to simulate intelligent human conversation? According to Richard Dooling in *Rapture for the Geeks*, maybe not that long. It took humans millions of years to develop opposable thumbs which we now use to build computers but computers go from megabytes to gigabytes in five years from the invention of the PC to the Internet in less than fifteen. At the accelerating rate of technological development, AI should surpass IQ in the next seven to thirty seven years depending on who you ask. We are sluggish biological sorcerers but we've managed to create whiz bang machines that are evolving much faster than we are. In this fascinating, entertaining and illuminating book, Dooling looks at what some of the greatest minds have to say about our role in a future in which technology rapidly leaves us in the dust. As Dooling writes, comparing human evolution to technological evolution is worse than apples and oranges. It's appliances versus orangutans. Is the era of Singularity when machines outthink humans almost upon us? Will we be enslaved by our supercomputer overlords as many a sci fi writer has wondered? Or will humans live lives of leisure with computers doing all the heavy lifting? With antic wit, fearless prescience and common sense, Dooling provocatively examines nothing less than what it means to be human in what he playfully calls the age of b.s. before Singularity and what life will be like when we are no longer alone with Mother Nature at Darwin's card table. Are computers thinking and feeling if they can mimic human speech and emotions? Does processing capability equal consciousness? What happens to our quaint beliefs about God when we're all worshipping technology? What if the human compulsion to create ever more capable machines ultimately leads to our own extinction? Will human ingenuity and faith ultimately prevail over our technological obsessions? Dooling hopes so and his cautionary glimpses into the future are the best medicine to restore our humanity.

Solidarity Leah Hunt-Hendrix, Astra Taylor, 2025-08-26 A VULTURE BEST BOOK From renowned organizers and activists Leah Hunt-Hendrix and Astra Taylor comes the first in-depth examination of Solidarity not just as a rallying cry but as potent political movement with potential to effect lasting change. A DAYTON LITERARY PEACE PRIZE FINALIST A window into what is possible when we reject the politics of division, trade individualism for interconnectedness and prioritize coming together for the greater good. Heather McGhee, author of *The Sum of Us: What Racism Costs Everyone* Reads at once like a moral treatise and a rallying manifesto a

call to reflect and lock arms The Washington Post Solidarity is often invoked but it is rarely analyzed and poorly understood Here two leading activists and thinkers survey the past present and future of the concept across borders of nation identity and class to ask how can we build solidarity in an era of staggering inequality polarization violence and ecological catastrophe Offering a lively and lucid history of the idea from Ancient Rome through the first European and American socialists and labor organizers to twenty first century social movements like Occupy Wall Street and Black Lives Matter Hunt Hendrix and Taylor trace the philosophical debates and political struggles that have shaped the modern world Looking forward they argue that a clear understanding of how solidarity is built and sustained and an awareness of how it has been suppressed is essential to warding off the many crises of our present right wing backlash irreversible climate damage widespread alienation loneliness and despair Hunt Hendrix and Taylor insist that solidarity is both a principle and a practice one that must be cultivated and institutionalized so that care for the common good becomes the central aim of politics and social life
