Appendix II. This means that special permits will be required for the import/export of these animals between countries. The related Indian python *Python molurus molurus* is considered endangered and listed as an Appendix I animal. It is also listed as endangered under the U.S. Endangered Species Act and therefore requires special permits for transport between countries as well as for ownership and movement of animals between states within the U.S.

For information on CITES and ESA permits and regulations, write to: the U.S. Fish and Wildlife Service, Federal Permit Office, 1001 N. Glebe Rd., Room 611, Arlington VA 22201.

Burmese pythons are now protected in Thailand and consequently relatively few wild collected animals are being imported into the U.S.

SIZE

Hatchling Burmese pythons measure between 18 inches (trunks) and 29 inches. Breeders indicate an average length of 22 inches among captive-bred animals. The average weight of hatchlings will be around 4oz (115g). Female Burmese pythons can grow to between 13 and 18 feet and there are records of animals over 19 feet but no authenticated records of animals over 20 feet. Males are typically smaller and their lengths range from 8 to 14 feet though occasionally a male will grow to a length of 16-17 feet (Bob Clark pers. comm). For their size, Burmese pythons are among the heaviest of the giant snakes with 17-18 foot animals achieving weights of over 200 lbs.
