## **Syntax Of Anaphoric Binding:**

The Syntax of Anaphoric Binding Mary Dalrymple, 1993-07 Mary Dalrymple provides a theory of the syntax of anaphoric binding couched in the framework of Lexical Functional Grammar Cross linguistically anaphoric elements vary a great deal One finds long and short distance reflexives sometimes within the same language pronominals may require local noncoreference or coreference only with nonsubjects Analyses of the syntax of anaphoric binding which have attempted to fit all languages into the mold of English are inadequate to account for the rich range of syntactic constraints that are attested How then can the cross linguistic regularities exhibited by anaphoric elements be captured while at the same time accounting for the diversity that is found Dalrymple shows that syntactic constraints on anaphoric binding can be expressed in terms of just three grammatical concepts subject predicate and tense These concepts define a set of complex constraints combinations of which interact to predict the wide range of universally available syntactic conditions that anaphoric elements obey Mary Dalrymple is a member of the research staff of the Natural Language Theory and Technology group at the Xerox Palo Alto Research Center

**The Derivation of Anaphoric Relations** Glyn Hicks, 2009-03-11 The Derivation of Anaphoric Relations resolves a conspicuous problem for Minimalist theory the apparently representational nature of the binding conditions Hicks adduces a broad variety of evidence against the binding conditions applying at LF and builds upon the insights of recent proposals by Hornstein Kayne and Reuland by reducing them to the core narrow syntactic operations specifically Agree and Merge Several novel and independently motivated claims about syntactic features and phases are made not only explaining the previously stipulated roles played by c command reference and locality but furnishing the derivational binding theory with sufficient flexibility to capture some long problematic empirical phenomena These include connectivity effects picture noun reflexives in English and anaphor pronoun non complementarity Specific proposals are also made for extending the derivational approach to accommodate structured crosslinguistic variation in binding with thorough expositions and analyses of the Dutch Norwegian and Icelandic pronominal systems

**NP-Anaphora in Modern Greek** Michael Chiou, 2010-01-08 Anaphora is one of the most fascinating linguistic phenomena as it constitutes a unique and universal property of human language Every single natural language provides linguistic means which facilitate speakers to refer to entities in the world The understanding of the complexity of anaphora and of the problems surrounding it will ameliorate our understanding of the nature of human languages This explains why anaphora constitutes a central research topic in contemporary linguistic science This study examines the phenomenon of NP anaphora with the main focus on modern Greek By maintaining the empirical and theoretical benefits of the classical generative approach to binding in this study we propose a partial pragmatic reduction of the interpretation of NP anaphora in modern Greek in terms of the neo Gricean pragmatic principles of communication The proposed analysis is articulated on the following basis it is argued that the choice of anaphoric expressions and their interpretation by Greek speakers and addressees respectively is heavily

dependent on preference which is regulated by principles of language use and communication Therefore by employing a model which is based on the systematic interaction of the neo Gricean pragmatic principles of communication we provide a neat and more elegant approach to NP anaphora resolution for modern Greek In a nutshell this study offers a quite new perspective into the study of NP anaphora in modern Greek but it is also a little step towards a better understanding of the phenomenon of anaphora across languages *The Syntax-Discourse Interface* Petra B. Schumacher,2005-09-22 This book combines theoretical and experimental aspects of the establishment of dependency It provides an account of dependency relations by focusing on the representation and interpretation of referentially dependent elements particularly regular reflexives logophors and pronouns First the establishment of dependency is discussed within a model of syntax discourse correspondences that predicts an economy based dependency hierarchy contingent on the level of representation at which the dependency is formed as well as the internal structure of the dependent element and its antecedent Secondly the model's predictions are substantiated by a series of experimental studies conducted in English and Dutch providing evidence from three sources of online sentence comprehension reaction time studies Broca's aphasia patient studies and event related brain potential studies The findings show that dependencies are established at distinct levels of linguistic encoding i.e syntax or discourse determined by the presence or absence of coargumenthood and the representation of the dependency forming elements

*The Logic of Pronominal Resumption* Ash Asudeh,2012-01-19 This book is a cross linguistic investigation of resumptive pronouns and related phenomena Pronominal resumption is the realization of the base of a syntactic dependency as a bound pronoun Resumption occurs in unbounded dependencies such as relative clauses and questions and in the variety of raising known as copy raising Processing factors may also give rise to resumption even in environments where it does not normally occur in a given language Ash Asudeh proposes a new theory of resumption based on the use of a resource logic for semantic composition and the typologically robust observation that resumptive pronouns are ordinary pronouns in their morphological and lexical properties The framework for semantic composition is Glue Semantics and the syntactic framework is Lexical Functional Grammar The author introduces these frameworks and the concept of resource logics accessibly and compares results and explanations with those offered by a number of contrasting theoretical frameworks The theory achieves a novel unification of hitherto heterogeneous resumption phenomena It unifies two kinds of resumptive pronouns that are found in unbounded dependencies one kind behaves syntactically like a gap whereas the other kind does not It also unifies resumptive pronouns in unbounded dependencies with the obligatory pronouns in copy raising The theory also provides the basis for a new understanding of processing based resumption both in production and in parsing and interpretation This book makes a substantial contribution to the understanding of the syntax semantics interface the nature of unbounded dependencies and linguistic variation It is clearly written and includes examples from a wide range of languages such as English Hebrew Irish Swedish and Vata It will interest researchers in syntax and semantics and its results are also relevant

Borsley,Jean-Pierre Koenig ,2021 Head Driven Phrase Structure Grammar HPSG is a constraint based or declarative approach to linguistic knowledge which analyses all descriptive levels phonology morphology syntax semantics pragmatics with feature value pairs structure sharing and relational constraints In syntax it assumes that expressions have a single relatively simple constituent structure This volume provides a state of the art introduction to the framework Various chapters discuss basic assumptions and formal foundations describe the evolution of the framework and go into the details of the main syntactic phenomena Further chapters are devoted to non syntactic levels of description The book also considers related fields and research areas gesture sign languages computational linguistics and includes chapters comparing HPSG with other frameworks Lexical Functional Grammar Categorial Grammar Construction Grammar Dependency Grammar and Minimalism     *Concise Encyclopedia of Syntactic Theories* K. theories of syntax contributors discuss the nature of these voice systems the function of their verbal morphology valence verbal diathesis and transitivity in such languages and the nature of their lexical categories Each analysis is presented within the frameworks of lexical functional grammar and head driven phrase structure grammar
