EOHT22 (I / M) /P

1. Description

The EOHT22 is a compact, heavy-duty industrial controller designed for marine, industrial, and general applications. It features a ruggedized design with a stainless steel housing and a touch-sensitive keypad. The unit is designed to withstand harsh marine environments, including salt spray, dust, and vibration. It is also IP65 rated for protection against water and dust.

For more information, please refer to the user manual or contact our support team.

2. Operation Modes

2.1. Main Encoder

The EOHT22 can be used as a standard 16-bit or 32-bit word encoder, or as the base for 'One Program, Three Functions' mode. In this mode, the EOHT22 can be configured to perform three different functions simultaneously. For example, it can control a motor, monitor a sensor, and display the status of the system on a single screen.

2.2. Terminal

The EOHT22 can also be used as a terminal or slave, and it can communicate with a master. This allows the EOHT22 to be used in a distributed control system, where multiple EOHT22 units can be connected to a single master unit. The EOHT22 can also be used as a slave to a master unit, such as a PLC or a PC, to receive commands and send data back to the master unit.

2.3. Regular Encoder

The EOHT22 can also work as a regular encoder with a standard assignment register, such as a 16-bit or 32-bit word. This allows the EOHT22 to be used as a standard encoder, without the need for a 'One Program, Three Functions' mode. The EOHT22 is also designed to be used in harsh environments, such as marine and industrial applications.

3. Keypad Definition

The EOHT22 has a standard 16x2 character LCD display, which is used to display the status of the unit. The following table shows the keypad layout and the function of each key. For specific information regarding the usage of a specific function, please refer to the user manual or contact our support team.
