Brian Nolan,Elke Diedrichsen,2013-12-06 There is a growing awareness of the significance of constructions in grammar in the world s languages To date there has not been a single volume that addresses the issues of constructions within a functional Role and Reference Grammar RRG account The book is a collection of articles that will serve the scholarly community as a reference work on the role place and significance of constructions within this functional model of grammar As a result this volume represents the first instance of cross linguistic comparison of these important discourse and syntax related phenomena The articles cover a variety of typologically different languages including German Irish Spanish French Japanese Yaqui Tepehua Totonacan Persian and English and they offer new data on the role of constructions within the RRG theory in these languages Further this volume contributes towards providing a comprehensive overview of grammatical constructions which are central to our understanding of how human languages function in a functional linguistics perspective This scholarly work is grounded in a functionally oriented model that makes strong claims of descriptive and typological adequacy The book will represent a valuable step forward in linguistics research as it applies the RRG theoretical framework to the analyses of constructions Structure and Function Christopher Butler,C. S. Butler,2003 Volume two of a two volume set outlining and comparing three approaches to the study of language labelled structural functionalist Functional Grammar FG Role and Reference Grammar RRG and Systemic Functional Grammar SFG *Constructional and Cognitive Explorations of Contrastive Linguistics* Annalisa Baicchi,Cristiano Broccias,2024-02-22 This book approaches the field of contrastive linguistics from a comparative and robust perspective that combines the tenets of construction grammar and cognitive

linguistics In doing so it shows how their integration can help to successfully enhance research on contrastivity by means of updated theoretical frameworks and applied methodologies that combine language and thought It compares ten different languages and offers analyses of constructions at all levels of the linguistic organization identifying the cognitive motivations that instantiate the linguistic data retrieved from corpora Relevant to both cognitive and non cognitive linguists interested in variation and contrastive approaches as well as graduate students in these areas this book makes a significant contribution to existing work on the various types of constructional and discourse based phenomena in modern languages *Theory and Practice in Functional-Cognitive Space* María de los Ángeles Gómez González, Francisco José Ruiz de Mendoza Ibáñez, Francisco González-García, Angela Downing, 2014-07-22 The differences among functionalist cognitivist and or constructionist models are generally taken to be not absolute but rather a matter of emphasis and degree with an increasing permeability between paradigms arising from cross fertilizing influences This book further explores this burgeoning area of research through the notion of functional cognitive space namely the topography of the space occupied by functional cognitivist and or constructionist models against the background of formalist approaches in general and of Chomsky's Minimalism in particular Specifically the twelve contributions in the present volume update the reader on recent developments in functionalism Systemic Functional Grammar Functional Discourse Grammar and Role and Reference Grammar and cognitivism Word Grammar Cognitive Construction Grammar and the Lexical Constructional Model Plotting cognitive space proves particularly adequate for situating the six models represented in this volume not only in relation to each other but also potentially with respect to a wide spectrum of functionalist cognitivist and or constructionist models

viability of these notions in languages like Lithuanian and Latvian which have a rich case morphology and show many deviations from the canonical nominative accusative pattern of case marking The issues examined include differential object marking subjecthood in specificational copular constructions swarm type alternations and what they tell us about grammatical relations special types of subject and object marking in non finite clauses and non canonical grammatical relations induced by modal predicates One study provides a comparative outlook towards Icelandic another language noted for its complex marking of grammatical relations The articles in the volume represent various theoretical frameworks
