Systems Anthony Finkelstein,Michael J. Tauber,Roland Traunmüller,1990 Information systems may be regarded as an interaction of people and machines In the past however human factors took second place Nowadays the need to provide i a functionality that meets the user s needs and ii an ergonomic human machine interface which takes the way people would like to solve their tasks into consideration are both recognised as primary concerns by the designers of information systems The two major themes of this book are as follows As new methods and rigorous techniques come into use the proportion of information systems development effort devoted to analysis and design is set to increase and the study of human factors also to increase in importance Methods representation schemes tools and environments cannot be applied without a systematic understanding of their use by analysts and designers in development teams The book presents research results in this area Much study in software development has concentrated on a human factors perspective of the end user However this work has to be placed in the overall context of systematic analysis and design of information systems The book presents some new developments *BMAS ...* ,2005 **Journal of Management Information Systems** ,1984 **Innovationen bei Rechen- und Kommunikationssystemen** Bernd Wolfinger,1994-08-17 24 GI Jahrestagung im Rahmen des 13th World Computer Congress IFIP Congress 94 Hamburg 28 August 2 September 1994 **Third International Workshop on Software Specification and Design** ,1985 Formal Methods and Software Engineering ,2003
