Hansen,2020-01-20 Are you ready to seriously improve your game It has been said that chess is 99% tactics but whether that is an accurate reflection is hard to tell Nevertheless it is important But if you are like most players you only discover the tactics after you come home and run through your game with a chess engine So what to do In the present book you will be challenged 404 times but unlike most tactics puzzle books you don t know what your objective is do I need to find a mate find an opportunity skewer or pin a piece use a tactical turn to gain a positional advantage and how far do I need to calculate These questions are you are faced with when you play your own games and therefore this book tries to replicate this position Your one advantage over the players in the respective positions is that you know that there is supposed to be something in there for you to find The puzzles vary a lot in difficulty some are relatively easy some are incredibly difficult but most are somewhere in between However most of the puzzles are layered so that even when you think the answer is obvious it is worth looking further because your idea may be the decoy left there for you to get distracted from the actual solution Working through the puzzles and then carefully play through the thoroughly annotated solutions will help you to up your tactical radar as well as your calculation skills So if you are up for the challenge here is the opportunity to take the leap forward Good luck Black Belt ,1993-02 The oldest and most respected martial arts title in the industry this popular monthly magazine addresses the needs of martial artists of all levels by providing them with information about every style of self defense in the world including techniques and strategies In addition Black Belt produces and markets over 75 martial arts oriented books and videos including many about the works of Bruce Lee the best known marital arts figure in the world
