Take Charge Student Centered Approach To English 2:

Student-Centered Approach to Teaching & Learning English Language: It Takes Two to Tango Dr. Mujtaba Saeed Arman, Dr. Swayam Prabha Satpathy, 2024-10-16 The primary aim of this book is to pinpoint the intrinsic theories that led to the rise of student based teaching and learning at the tertiary level of education. This book is about teaching English language grounded upon Student based teaching and learning philosophy which is deemed to be a novel precept in the theory of education in the world of academia. The book provides real examples of how to engage students in the learning process to be active participants. It also gives factual examples of making the learning process meaningful and a bit of fun. In a nutshell the book views learning in today's world as an engaging process where a number of educational programs/strategies are designed to meet students' needs/interests and their different socio-cultural backgrounds. It's about engagement and participation via various instructional approaches.

Student Centered Cooperative Learning George M Jacobs, Willy A Renandya, 2019-04-30 This book helps teachers understand the links between cooperative learning, also known as collaborative learning and peer learning, and other student-centered approaches. It discusses cooperative learning and communities of practice, cooperative learning and neuroscience, cooperative learning and critical thinking, cooperative learning and alternative assessment, cooperative learning and multiple intelligence, cooperative learning and positive education, cooperative learning and meeting the needs of introverts, and cooperative learning and justice issues. Each chapter explores a different aspect of how education can be student-centered. If you are looking for a fresh perspective on cooperative learning, this book is for you. It helps you explore how cooperative learning is so much more than just asking students to arrange themselves in a group and considers how cooperative learning can fit with other areas of education that you care about. Although the two authors both completed their PhDs in the West, they have taught in Asia for the past 25 years, working with students and teachers from a wide variety of Asian and other countries, and with teachers from a very wide variety of content areas who teach students of many different ages.
