The Best That Money Can't Buy Beyond Politics Poverty War:

The Best That Money Can't Buy Jacque Fresco, 2018 *The Best That Money Can't Buy* by Jacque Fresco envisions a global civilization in which science and technology are applied with human and environmental concern to secure, protect, and encourage a more humane world for all people. This book offers a possible way out of our recurring cycles of boom and recession, famine, poverty, a declining environment, and territorial conflicts where peace is merely the interval between wars. Fresco presents a blueprint for a holistic socio-economic system he calls a Resource-Based Economy which uses the methods of science applied to the way we operate society, offering a standard of living far beyond anything ever imagined possible in the past. It is a new vision of hope for all of the world's people in an age of abundance which surpasses the need to monetize anything. In Fresco's design of the future, machines and cybernation are used to enhance the lives of people by freeing them to engage in more creativity, endeavors in the arts and sciences. Machines will be assigned the task of the production of goods and services. This does not imply a machine taking over. They will not manage people; this will be considered counterproductive and socially offensive. *The Best That Money Can't Buy* outlines an attainable humane social design of the near future where human rights are no longer paper proclamations but a way of life. *The Best That Money Can't Buy* is a challenge to all people to work toward a society in which all of the world's resources become the common heritage of all of the earth's people. It is accompanied by 70 color photos of Fresco's original designs which illuminate the fulfilling lifestyle of a global Resource-Based Economy.

The Best That Money Can't Buy Jacque Fresco & Roxanne Meadows, FEW TECHNOLOGICAL ACHIEVEMENTS are as impressive as the ability to see our own planet from outer space. The beautiful sphere suspended against the black void of space makes plain the bond that the billions of us on Earth have in common. This global consciousness inspires space travellers who then provide emotional and spiritual observations. Their views from outer space awaken them to a grand realization that all who share our planet make up a single community. They think this viewpoint will help unite the nations of the world in order to build a peaceful future for the present generation and the ones that follow. Many poets, philosophers, and writers have criticized the artificial borders that separate people preoccupied with the notion of nationhood. Despite the visions and hopes of astronauts, poets, writers, and

visionaries the reality is that nations are continuously at war with one another and poverty and hunger prevail in many places throughout the world including the United States So far no astronaut arriving back on Earth with this new social consciousness has proposed to transcend the world's limitations with a world where no national boundaries exist Each remains loyal to his/her particular nation state and doesn't venture beyond patriotism my country right or wrong because doing so may risk their positions Most problems we face in the world today are of our own making We must accept that the future depends upon us Interventions by mythical or divine characters in white robes descending from the clouds or by visitors from other worlds are illusions that cannot solve the problems of our modern world The future of the world is our responsibility and depends upon decisions we make today We are our own salvation or damnation The shape and solutions of the future depend totally on the collective effort of all people working together *The Failing Logic of Money* Duane

people are struggling to find stability in the aftermath of our country's political and economic collapse sometimes at dire and disillusioning costs **How the World Will Change with Global Warming** Trausti Valsson, 2006 Hotter summers and milder winters have already made most of us aware of what scientists say is a trend towards extensive global warming. Most of the experts accompany their predictions with dire warnings of the resulting rising sea levels and spreading deserts. Trausti Valsson's approach to the problem of global warming is a refreshing look at the advantages that will ensue. With the melting of the sea ice in the north shipping routes will regularly include the passage north of Siberia and slightly later a north west passage through the Canadian Archipelago. This means that countries bordering the Pacific and Atlantic Oceans will become closer to each other and that ships too wide for the Panama and Suez Canals can easily transport oil and other cargoes via the shorter routes over the Arctic Ocean. The warming climate and melting ice will make oil and mineral resources in northern areas easily accessible for exploitation and will make the far north comfortable for human habitation replacing the living spaces around the central areas of the globe that will become too hot for habitation. Valsson recognizes the fact that the world's climate has changed many times in the past and that the present warming trend is not new. However he underlines the importance of the international agreements for reducing greenhouse gas emissions which are largely to blame for the current warming trend. He also promotes the view that even in the face of the very many negative consequences we need to maintain a positive attitude towards the changes that are coming upon us a refreshing view which he presents through text and a wealth of informative maps.
