System Level Synthesis:

System-Level Synthesis Ahmed Amine Jerraya, Jean Mermet, 2012-12-06 System Level Synthesis deals with the concurrent design of electronic applications including both hardware and software. The issue has become the bottleneck in the design of electronic systems including both hardware and software in several major industrial fields including telecommunications, automotive and aerospace engineering. The major difficulty with the subject is that it demands contributions from several research fields including system specification, system architecture, hardware design and software design. Most existing books cover well only a few aspects of system level synthesis. The present volume presents a comprehensive discussion of all the aspects of system level synthesis. Each topic is covered by a contribution written by an international authority on the subject.

Models in System Design Jean-Michel Bergé, Oz Levia, Jacques Rouillard, 2012-12-06 Models in System Design tracks the general trend in electronics in terms of size, complexity and difficulty of maintenance. System design is by nature combined with prototyping, mixed domain design and verification and it is no surprise that today's modeling and models are used in various levels of system design and verification. In order to deal with constraints induced by volume and complexity, new methods and techniques have been defined. Models in System Design provides an overview of the latest modeling techniques for use by system designers. The first part of the book considers system level design, discussing such issues as abstraction, performance and trade offs. There is also a section on automating system design. The second part of the book deals with some of the newest aspects of embedded system design. These include co-verification and prototyping. Finally, the book includes a section on the use of the MCSE methodology for hardware/software co-design. Models in System Design will help designers and researchers to understand these latest techniques in system design and as such will be of interest to all involved in embedded system design.

Computer Hardware Description Languages and their Applications D. Agnew, L. Claesen, R. Camposano, 2014-05-21 Hardware description languages (HDLs) have established themselves as one of the principal means of designing electronic systems. The interest in and usage of HDLs continues to spread rapidly, driven by the increasing complexity of systems, the growth of HDL-driven synthesis, the research on formal design methods and many other related advances. This research-oriented publication aims to make a strong contribution to further developments in the field. The following topics are explored in depth: BDD-based system design and analysis, system level formal verification, formal reasoning on hardware languages for protocol specification, VHDL, HDL-based design methods, high level synthesis and text graphical HDLs. There are short papers covering advanced design capture and recent work in high level synthesis and formal verification. In addition, several invited presentations on key issues discuss and summarize recent advances in real-time system design, automatic verification of sequential circuits and languages for protocol specification.

Automating the Design of Computer Systems William P. Birmingham, Anurag P. Gupta, Daniel P. Siewiorek, 1992-12-18 Addressing the issues of engineering design in computer architecture, this book describes the design

and implementation of MICON a system for automating the synthesis of small computers *Advances in Computer Science and Engineering* Hamid Sarbazi-Azad, Behrooz Parhami, Seyed-Ghasem Miremadi, Shaahin Hessabi, 2008-11-23 It is our pleasure to welcome you to the proceedings of the 13th International Computer Society of Iran Computer Conference CSICC 2008 The conference has been held annually since 1995 except for 1998 when it transitioned from a year end to first quarter schedule It has been moving in the direction of greater selectivity see Fig 1 and broader international participation Holding it in Kish Island this year represents an effort to further facilitate and encourage international contributions We feel privileged to participate in further advancing this strong technical tradition
