Unreason Kendrick Frazier,Benjamin Radford,2023-10-17 UNREASON Exploring Pseudoscience Conspiracies and Extraordinary Claims is a collection of forty five of the best articles the legendary Skeptical Inquirer magazine has published in the past decade. Featuring articles from writers including Neil deGrasse Tyson on the process of science Richard Dawkins on the standards of truth Elizabeth Loftus on memory Steven Pinker on the notion of progress and many others covering topics from the politicization of science to the frightening rise of misinformation each entry in this collection brings scientific examination to bear in order to ferret out the facts and misconceptions behind popular claims. All of the articles within are interesting and readable. Yet they are also quite diverse. Some articles reinforce and complement each other others as happens in science may voice disagreements or differing perspectives. But they all have one thing in common a respect for evidence a demand for the best most well tested most scientifically reliable information. Readers will learn Why and how conspiracy rumors start spread and readily gain believers. How to stay afloat in a sea of disinformation and survive the age of misinformation. Why and how we form beliefs and adhere to them so powerfully. How and why memory is fallible and what we can do about it. How pseudoexperiments mislead the public about science. Unreason will arm readers with scientific knowledge to curb the misinformation and misconceptions that increasingly threaten our civil discourse. Even further these essays present a way for us to be better citizens equipped to deal with the winds of misinformation and disinformation swirling about us and better able to look ahead to a world where science and reason indeed just good old common sense can prevail.
