**Communication in Modern Social Ordering** Kai Eriksson,2011-07-21 Communication in Modern Social Ordering  
investigates the modern history of communication in relation to the thinking of the political community in the United States  
By illustrating the intertwining of the technological developments in communication methods and its community building  
effects the different representations of society and their political implications are examined against the development of  
communication systems from the telegraph to the telephone to computer networks It was the telegraph that made  
communication a continual process thus freeing it from the rhythmical motion of the postal service and from physical  
transportation in general and provided both a model and a mechanism of control Using the theories of both Foucault and  
Heidegger to provide a lens for new investigation the author studies not the meanings of communication and its logic as such  
but rather the conditions and structures that allow meanings and logic to be formulated in the first place The book offers an
