Goldstein,1998 Do It Yourself investigates the history behind the current do it yourself craze in homebuilding and home repair The origins of home improvement can be traced to the early part of the century when government loan programs placed home ownership within the reach of growing numbers of families mass circulation magazines began providing their readers with information about home remodeling and repair and increasing numbers of Americans turned to the manual arts and handicrafts as leisure time pursuits World War II provided many Americans with the skills and confidence to undertake home improvement projects on their own and after the war changes in the manufacturing and retail of tools and equipment created new possibilities for transforming one's home As home remodeling became a central feature of domestic life and consumer culture the do it yourself movement was born coming of age in the baby boomer 1950s and 1960s when Americans created suburban paradises and reclaimed decaying urban centers The text of Do It Yourself which investigates topics ranging from women's roles in home repair to historic preservation is a lively mix of illustrations including period photographs magazine spreads and advertisements and clearly written analysis of the trends behind these images **Our House** ,2006-01-01 Space has emerged in recent years as a radical category in a range of related disciplines across the humanities Of the many possible applications of this new interest some of the most exciting and challenging have addressed the issue of domestic architecture and its function as a space for both the dramatisation and the negotiation of a cluster of highly salient issues concerning amongst other things belonging and exclusion fear and desire identity and difference Our House is a cross disciplinary collection of essays taking as its focus both the prospect and the possibility of the house This latter term is taken in its broadest possible resonance encompassing everything from the great houses so beloved of nineteenth century English novelists to the caravans and mobile homes of the latterday travelling community and all points in between The essays are written by a combination of established and emerging scholars working in a variety of scholarly disciplines including literary criticism sociology cultural studies history popular music and architecture No specific school or theory predominates although the work of two key figures Gaston Bachelard and Martin Heidegger is engaged throughout This collection engages with a number of key issues raised by the increasingly troubled relationship between the cultural built and natural environments in the contemporary world **The Woman's Fix-it Book** Arthur Symons,1949 *The Woman's Fix-it Book* Karen Dale Dustman,1998 A general introduction to common household maintenance projects **The New Woman's Survival Catalog** Kirsten Grimstad,Susan Rennie,1973 Communications Art Self health Children Learning Self defense Work and money Getting justice Building the movement
