The Fleischer Story:

The Fleischer Story Leslie Cabarga, 1988-03-21 The Fleischer brothers Max and Dave were animation pioneers Creators of Betty Boop Koko the Clown and the Bouncing Ball they also brought Popeye the Sailor Man to the screen and produced the first feature length animated cartoon on the theory of relativity Max invented the Rotoscope and for a while the brothers kept pace with Disney in performance and profit But after 1942 the studio closed and their films vanished What happened and how they developed are examined for the first time in this work for many years out of print and a collector's item It is here updated and enlarged with hundreds of sketches and storyboard layouts where these classic cartoons can once again receive the attention and adulation they deserve

The Art and Inventions of Max Fleischer Ray Pointer, 2017-06-09 The history of animated cartoons has for decades been dominated by the accomplishments of Walt Disney giving the impression that he invented the medium In reality it was the work of several pioneers Max Fleischer inventor of the Rotoscope technique of tracing animation frame by frame over live action footage was one of the most prominent By the 1930s Fleischer and Disney were the leading producers of animated films but took opposite approaches Where Disney reflected a Midwestern sentimentality Fleischer presented a sophisticated urban attitude with elements of German Expressionism and organic progression In contrast to Disney's naturalistic animation Fleischer's violated physical laws supporting his maxim If it can be done in real life it isn't animation As a result Fleischer's cartoons were rough rather than refined commercial rather than consciously artistic yet attained a distinctive artistry through Fleischer's innovations This book covers his life and work and the history of the studio that bore his name with previously unpublished artwork and photographs
