

**Objectivity: An Introduction**

Students demonstrate an understanding of engineering problem-solving techniques simply from the knowledge already provided by learning the principles of thermodynamics. The key to understanding the introduction of design is to present the primary responsibility of an engineer. The typical engineering culture is to design, and it is this design process that gives the students the specific creative path. Students evaluate their problem statement, define the design problem, the system, constraints or other given data, and it is from evaluating that a design strategy develops. It is essential to show the engineering culture approach to the design process, and to demonstrate the process of engineering. The goal is to show the engineering culture and to show the value of the design process. The design process is a process of design, and the value of the design process is to show the engineering culture.
