History

The History of the Company is really divided into four periods:

1. From 1356 when the Farriers in the City were called together by the Mayor of the City of London and first established as a Fellowship until 1674, during which years it was the endeavour of the Company to look after the Trade in the Area, being 'the Cities of London and Westminster or within the seven miles thereof'.
2. From 1674, the date of the Charter, by Letters Patent under the Privy Seal to 1890 when the Company, together with the Royal Agricultural Society and the Royal Society of Veterinary Surgeons, began a Scheme for the Examination and Registration of Shoeing Smiths Nationally.
3. From 1890 to 1975, the date of the Farriers Act.

The Farrier And His Craft The History Of The Worshipful Company Of Farriers

Louise Hill Curth

The Farrier And His Craft The History Of The Worshipful Company Of Farriers:

The Farrier and His Craft Leslie B. Prince, 1980 The history of the Worshipful Company of Farriers
Brute Beasts Louise Hill Curth, 2010 This book is about medical beliefs and practices for animals in early modern England
Although there are numerous texts on human health this is the first to focus exclusively on animals during this period For most academics the foundation of the London Veterinary College in 1791 marks the beginning of modern veterinary medicine with the period before unworthy of serious study In fact there is ample evidence of how the importance of animals resulted in a highly complex system of both preventative and remedial care This book is divided into sections which start by setting the scene with an overview of animals in early modern England and the contemporary principles behind health and illness It moves onto an examination of the medical marketplace and printed literature on animal health care followed by an in depth look at preventative and remedial methods It ends by addressing the question of what impact if any new colleges had on veterinary beliefs and practices

'A plaine and easie waie to remedie a horse' Louise Hill Curth, 2013-09-15 A plaine and easie waie to remedie a horse is the first complete text to focus exclusively on the health and illness of the most important animals in early modern England It also follows on and further develops the subject of early modern veterinary medicine introduced by Louise Hill Curth in The Care of Brute Beasts a social and cultural study of veterinary medicine in early modern England This book is divided into three sections which start by providing an overview of the evolution of English hippiatric medicine from ancient and medieval times into the early modern period The second section moves on to the structures of practice which include the astrological principles between preventative remedial and surgical medicine for horses followed by an in depth discussion of how such knowledge was disseminated through the oral manuscript and print culture

Veterinary Medicine Pamela Hunter, 2016-12-05 Veterinary medicine has long been recognized as one of the more neglected areas of medical history One of the main stumbling blocks to research is the lack of comprehensive information regarding the survival and availability of primary source material Veterinary Medicine A Guide to Historical Sources redresses these issues for the first time offering researchers an unparalleled tool with which to approach the subject The book opens with a brief history of veterinary medicine and the veterinary profession from the fourteenth to the beginning of the twenty first centuries identifying the key dates and events that shaped their development There then follows a chapter on the nature and uses of the records covered by the book outlining the types of records found the type of information they contain and their likely uses by different types of researcher A brief user s guide then explains how to use the book After these preliminary sections comes the main body of the book the lists of records It is here that the various practices and institutions covered by the book are listed together with the types of records they hold the dates they cover and where they are kept A short biographical history is also included with each entry where appropriate Taken as a whole this volume will prove to be an invaluable aid for any scholar researching the history of veterinary medicine in Britain

The City of London

and Its Livery Companies I. G. Doolittle,1982 The Industrial Archaeology and Industrial History of London ,1988

Bibliography of Printed Works on London History to 1939 Heather Creaton,Tony Trowles,1994 The history of London is so important in national and indeed international terms it seems extraordinary that this is the first general bibliography of the subject to appear It contains over 22 000 selected references to books and articles on the history of London from the Dark Ages to the beginning of the Second World War The whole of the former GLC area plus the City is covered Arrangement is by subject and there is a substantial analytical index Material for the bibliography was collected from specialist libraries all over London and beyond It is a starting point for any enquiry about London s development over the centuries whether from the academic historian the amateur or the general enquirer A supplement is planned to cover new material on the period

English Almanacs, Astrology and Popular Medicine, 1550-1700 Louise Hill Curth,2007 Early modern almanacs have received relatively little academic attention over the years despite being the first true form of British mass media While their purpose was to provide annual information about the movements of the stars and the corresponding effects on Earth most included advice on preventative and remedial medicine for humans and animals Based on the most extensive research to date into the relationship between the popular press and early modern medical beliefs and practices this study argues that these cheap annual booklets played a major role in shaping contemporary medicine in early modern England The book discusses the various types of medical information and advice in almanacs preventative and remedial medicine for humans and the under explored topic of animal health care The Londonderry Plantation, 1609-1914 James Stevens Cull,1986
