Creation for Progressive Christians Donald Schmidt,2020-06-23 Behind all the creation stories there is a basic assumption that God was involved the how of it was a secondary concern to the original writers The publication of this study guide is timely given the current conversations and warnings around the health of creation and climate change One can easily find online in magazines or on television images of animals that cannot find food dry areas that used to be lakes and rivers floods beyond belief and places such as Tuvalu where palm trees now grow underwater because the ocean level has risen Clearly climate change is real and impacting people around the globe The question therefore is not Does it exist or even Is this thing human caused or the natural cycle of things but rather What do we do to slow it down and enhance life for all species Although it is not a book about climate change but rather an exploration of five biblical creation stories this study can help progressive Christians engage these questions Understanding the biblical creation stories can help us see creation as a delicate balance and our role in it as stewards As people of faith it is incumbent on us to understand our relationship

with every facet of the divine which is clearly present in the world and everything around us The question behind this book is this What did our ancient ancestors want us to understand about the creation of the universe the divine presence in that creation and how we might live our lives in response to that

The Coercive Animal James S. Serilla, 2009-03-13 The coercive animal exists because our social systems of thought throughout the history of humankind have been unaccountable Our use of reason and rational thought allowed us to place the idea of reality anywhere one senses it to be From this ambiguity we have our history of ideas by decree from ancient philosophy to our modern thinkers Our religious thought our rational thought our governments and our economic systems they all operate without accountability When we learn how ideas work we understand how we move ideas within our minds to create ideas that may or may not relate to reality We understand how to categorize our ideas We discover how people can create intellectual shell games by initiating movement between broadband and narrowband ideas as well as between universal and limited ideas When we have this knowledge we expose the coercive animal Historically we have defined coercion as the arbitrary will of one person forced onto another Nevertheless what are arbitrary and non arbitrary wills This book removes the ambiguity by taking the arbitrary out of arbitrary How we distinguish between the two resides within the pages of this book *The Coercive Animal* *The Variation of animals and plants under domestication* v. 2 Charles Darwin, 1876
