The Feminist Case Against Bureaucracy Women In The Political Economy:

The Feminist Case Against Bureaucracy Kathy E. Ferguson, 1984 Like it or not all of us who live in modern society are organization men and women We tend to be caught in the traditional patterns of dominance and subordination This book is both pessimistic and hopeful With devastating thoroughness the author shows how pervasive these patterns of relationship are in our work lives and personal lives and how deep they run into the very language of the organization and of ordinary life This is not a book about how women can succeed in business but a criticism of books like those success manuals and notions like that idea of success The author sees bureaucrats and clients as the second sex To fit in properly they just learn the skills necessary to cope with subordinate status skills that women have always learned as part of their femininity Liberal reforms placing more women in management positions for example are not enough What is required is the emergence of an alternative voice one grounded in the experience and perceptions of women that will challenge the patterns of control found in every aspect of modern life Public discourse today is not the language of women even when women speak it In this brilliant synthesis of the feminist literature and the literature on organizational theory and practice the author suggests how a feminist discourse could interject into public debate a reformulation of the basic political questions of power reason and organization and thereby legitimate a concern of both autonomy and community In the face of the massive incursions of bureaucracy into daily life this is an important contribution to the project of human liberation Publisher description

Protest, Policy, and the Problem of Violence against Women S. Laurel Weldon, 2013-12-09 Violence against women is one of the most insidious social ills facing the world today Yet governmental response is inconsistent ranging from dismissal to aggressive implementation of policies and programs to combat the problem In her comparative study of thirty six democratic governments Laurel Weldon examines the root causes and consequences of the differences in public policy from Northern Europe to Latin America She reveals that factors that often influence the development of social policies do not determine policies on violence against women Neither economic level religion region nor the number of women in government determine governmental responsiveness to this problem Weldon demonstrates for example that Nordic governments take no more action to combat violence against women than Latin American governments even though the Swedish welfare state is often considered a leader in social policy particularly with regard to women s issues Instead the presence of independently organized active women s movements plays a greater role in placing violence against women on the public agenda The breadth and scope of governmental response is greatly enhanced by the presence of an office dedicated to promoting women s status Weldon closes with practical lessons and insights to improve government action on violence against women and other important issues of social justice and democracy

Studies in Political Economy, 2000

A Path Toward Gender Equality Yoshie Kobayashi, 2004-04-23 The first study of state feminism in a non western nation state this volume focuses on the activities and roles of the Women s Bureau of the Ministry of Labor in post World War II Japan While state feminism theory possesses a strong capability to examine state society relationships in terms of feminist policymaking it tends to neglect a state s activity in improving women s status and rights in non western nations where the feminist movements are apathetic or antagonistic to the state and where the state also creates a vertical relationship with feminist groups
