*Sleep, Aging and Related Disorders* W. Emser, D. Kurtz, W. B. Webb, 1987-03-17      Sleep and Aging Mark P. Mattson, 2005-06-20 The book describes the mechanisms involved in the maintenance of neuroendocrine immune interactions in ageing The lack of this maintenance leads to the appearance of age related diseases cancer infections dementia and subsequent disability The capacity of some hormones or nutritional factors in restoring and remodelling the neuroendocrine immune response during ageing is reported presenting possible new anti ageing strategies in order to reach healthy ageing and longevity      Sleep and Ageing Kevin Morgan, 2017-09-07 Sleeping patterns change with age whether we are growing up or growing old While most people are prepared for the rapidly altering sleep patterns of growing children the evidence suggests that many are unprepared for additional sleep changes in later life either in themselves or in others In this book originally published in 1987 two research disciplines social gerontology and sleep research are brought together with the aim of providing a straightforward account of how sleep is changed and disrupted by the biological and social impact of ageing Attention then focuses on the personal and clinical response to these changes The use of sleeping drugs among elderly people is critically examined and effective alternatives including self help practices and psychological therapies are described The influence of ageing on the recall and content of dreams is also considered In the final chapter the author comments on current styles of responding to sleep problems in old age and discusses the need and the scope for change This book deals with topics of universal interest and provides valuable information for those professionally as well as personally concerned with sleep quality in later life including health professionals nurses doctors psychologists etc working with elderly people gerontologists and sleep researchers      **Sleep and Aging** Kevin Morgan, 1987      Biomedical Index to PHS-supported Research , 1987      The International Journal of Aging & Human Development , 1995      **Sleep and Clocks in Aging and Longevity** Anita Jagota, 2023-03-06 This edited volume focuses on the interplay between sleep and circadian rhythms with health aging and longevity Sleep is absolutely important for human health and survival as insufficient sleep is associated with a plethora of conditions including the poor quality of life onset of several diseases and premature death The sleep wake cycle is an evolutionary conserved neurobiological phenomenon and is a prominent manifestation of the biological clocks localised in the suprachiasmatic nucleus SCN Understanding bidirectional relationship between sleep and circadian rhythms is of utmost importance and urgency especially in the context of modern lifestyle where sleep is often out of phase with the internal body clocks social jetlag artificial lights and so on The 25 chapters by leading researchers and experts from 11 countries are arranged into seven sections understanding sleep and clock interlink in health and longevity sleep aging and longevity clock aging and longevity melatonin sleep and clock genetic regulation of sleep and clock therapeutic interventions in sleep disorders and clock misalignment and experimental models to study sleep and clocks in aging and longevity This book is useful for advanced undergraduate and graduate students and researchers educators and other biomedical
