Producing Mayaland Producing Mayaland powerfully captures the extent to which the abstract spaces of global capital are infused with colonial fantasies haunted by uncanny ruins and plagued by monstrous manifestations of ecological breakdown Through a compelling account of the maquiladora industry in the Yucatan Peninsula Claudia Fonseca Alfaro vividly conveys the inextricable entanglements of the capitalist production of space and the colonality of power Japhy Wilson School of Social Sciences University of Manchester UK In Producing Mayaland Claudia Fonseca Alfaro finds a unique voice to narrate the contested relations between everyday life urbanization and the uneven development of capitalism in Motul Yucat n Mexico The remarkable insights of this work emerge from her innovative synthesis of critical urban theory anticolonialism and magical realism all grounded in an imaginative appropriation of Henri Lefebvre s oeuvre on the production of space Kanishka Goonewardena Professor of Geography and Planning University of Toronto Critical urban theory and postcolonial approaches are brought together in this compelling book to explore the relationship between colonial legacies urbanization and global capitalism in southern Mexico Producing Mayaland investigates the boom to bust story of maquiladoras in the state of Yucat n to shed light on how the built environment was shaped by discourse imaginaries and everyday practices In making sense of this social production of space the author examines infrastructure constructed to support the maquiladora project and traces the attempts of the state to portray Yucat n as an exotic and business friendly maquiladora paradise These practices stand in contrast to the livelihood strategies and life stories of maquiladora workers and residents Carefully weaving geography history and ethnography the author draws on a wide range of sources to illustrate a central tension in capitalism its tendency to homogenize while thriving in differentiation With important insights into an

Longair,2023-04-10 Delineating the huge strides taken in cosmology in the past ten years this much anticipated second edition of Malcolm Longair s highly appreciated textbook has been extensively and thoroughly updated It tells the story of modern astrophysical cosmology from the perspective of one of its most important and fundamental problems how did the galaxies come about Longair uses this

approach to introduce the whole of what may be called classical cosmology. What's more, he describes how the study of the origin of galaxies and larger scale structures in the Universe has provided us with direct information about the physics of the very early Universe.

Cosmology's Century P. J. E. Peebles, 2020-06-02 From Nobel Prize winning physicist P. J. E. Peebles, the story of cosmology from Einstein to today. Modern cosmology began a century ago with Albert Einstein's general theory of relativity and his notion of a homogeneous philosophically satisfying cosmos. Cosmology's Century is the story of how generations of scientists built on these thoughts and many new measurements to arrive at a well tested physical theory of the structure and evolution of our expanding universe. In this landmark book, one of the world's most esteemed theoretical cosmologists offers an unparalleled personal perspective on how the field developed. P. J. E. Peebles was at the forefront of many of the greatest discoveries of the past century, making fundamental contributions to our understanding of the presence of helium and microwave radiation from the hot big bang, the measures of the distribution and motion of ordinary matter and the new kind of dark matter that allows us to make sense of these results. Taking readers from the field's beginnings, Peebles describes how scientists working in independent directions found themselves converging on a theory of cosmic evolution, interesting enough to warrant the rigorous testing it passes so well. He explores the major advances, some inspired by remarkable insights or perhaps just lucky guesses, as well as the wrong turns taken and the roads not explored. He shares recollections from major players in this story and provides a rare inside look at how science is really done. A monumental work, Cosmology's Century also emphasizes where the present theory is incomplete, suggesting exciting directions for continuing research.

Trademark Counterfeiting, Product Piracy, and the Billion Dollar Threat to the U.S. Economy Paul Paradise, 1999-09-30 Called the business crime wave of the 21st century, trademark counterfeiting and product piracy are worldwide in scope and cost the U.S. economy billions of dollars every year. High technology and the globalization of business have made it possible to counterfeit and pirate a seemingly limitless number of products, from t-shirts, designer jeans, films, and books to auto and airplane parts and prescription drugs. The 1995-1996 trade dispute between the U.S. and China shows how serious the problem has become for American business and for U.S. diplomatic relations. Paradise explores the history of counterfeiting and piracy, shows how they are done, and the strategies that U.S. businesses are using to combat them. With interviews, commentary, and anecdotes by corporate attorneys, business leaders, and private investigators, this well-written book is essential for anyone interested in the damage that violations of intellectual property law are inflicting on world trade and what is being done to stop it.
