Thomas Gordon Smith and the Rebirth of Classical Architecture Richard John, 2001 For the past two decades Thomas Gordon Smith has played a central role in the revival of classicism in contemporary architecture in America His conviction in the enduring relevance of this tradition to contemporary life has resulted in buildings which in terms of materials and function are just as much a product of the modern world as a high tech office building but in addition to admirably fulfilling the job for which they were intended they also have the rare quality of engaging us intellectually This extensively illustrated monograph presents Thomas Gordon Smith's buildings and projects for the first time A biographical essay explores the polymathic range of his other activities including his influential role as an educator commentator on Vitruvius historian of the Greek Revival painter of frescoes and designer and collector of furniture

The Language of Post-modern Architecture Charles Jencks, 1991 A classic account which when written in 1977 was the first to define post modernism in architecture an event which led to subsequent adoption of the term in many other fields It is the story of the failure of modern architecture to communicate with its users and the attempt of post modernists to overcome this failure with a richer more widely shared language post modern classicism This edition 5th in 1987 brings the account and the great illustrations up to date 101 4x121
