Speaking Social Interaction 2nd:

Peer Interaction and Second Language Learning Masatoshi Sato, Susan Ballinger, 2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative and mixed methods designs as well as cognitive social and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content based programs, online contexts and after school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

The book contains nine sections which aim to organise and reflect different dimensions of the diverse and complex scope of learning English as a second or additional language. Four themes which permeate the chapters are learning and learners, learning and language, learning and language development, learning and learning context. The 36 chapters are up to date and authoritative, written by experts in the field. The content is accessibly written with questions for discussion and follow up reading suggestions provided.
