Music-Inspired Harmony Search

Algorithm Zong Woo Geem, 2009-05-12 Calculus has been used in solving many scientific and engineering problems. For optimization problems, however, the differential calculus technique sometimes has a drawback when the objective function is step-wise discontinuous or multi-modal or when decision variables are discrete rather than continuous. Thus, researchers have recently turned their interests into metaheuristic algorithms that have been inspired by natural phenomena such as evolution, animal behavior, or metallic annealing. This book especially focuses on a music-inspired metaheuristic algorithm, harmony search. Interestingly, there exists an analogy between music and optimization: each musical instrument corresponds to each decision variable, musical note corresponds to variable value, and harmony corresponds to solution vector. Just like musicians in Jazz improvisation play notes randomly or based on experiences in order to find fantastic harmony, variables in the harmony search algorithm have random values or previously memorized good values in order to find optimal solution.

Speaking Better French Saul H. Rosenthal, 2008 This second book of key words and expressions gives you more of the absolutely essential words you'll need to know to navigate everyday French conversation. For example, it would be very difficult to get through a single day in France without hearing each of the words *truc*, *bise*, and *Pardon* at least once. Well, these words are all here and lots more like *d'accord*, *de fouteur*, *drôle*, *de*, and *en liquid*. The use of each is discussed and illustrated with examples. After reading this book, you will not only recognize these key words if you see or read them, but you will also be able to use them correctly yourself. This book will be a pleasure for you. It's one of those rare finds: a book that is both very useful and fun to read.
