Hornstein, Jairo Nunes, Kleanthes K. Grohmann, 2005-12-15 Understanding Minimalism first published in 2005 is an introduction to the Minimalist Program the model of syntactic theory within generative linguistics Accessibly written it presents the basic principles and techniques of the minimalist program looking firstly at analyses within Government and Binding Theory the Minimalist Program's predecessor and gradually introducing minimalist alternatives Minimalist models of grammar are presented in a step by step fashion and the ways in which they contrast with GB analyses are clearly explained Spanning a decade of minimalist thinking this textbook will enable students to develop a feel for the sorts of questions and problems that minimalism invites and to master the techniques of minimalist analysis Over 100 exercises are provided encouraging them to put these skills into practice Understanding Minimalism will be an invaluable text for intermediate and advanced students of syntactic theory and will set a solid foundation for further study and research within Chomsky's minimalist framework

**The Nature and Function of Syntactic Categories** Robert Borsley, 1999-10-15 To paraphrase of the making of syntactic categories there is no end For any theory of syntax questions arise about its classificatory scheme what are the categories What properties do they have How do they relate to each other Eleven essays address these questions by inquiring whether there is a clear distinction between lexical and functional categories how syntactic categories relate to semantic categories the relation between syntactic and morphological information as well as other inquiries Above all the essays highlight the centrality of questions about syntactic categories for a number of different theoretical frameworks It discusses a broad range of questions about syntactic categories and presents a number of theoretical frameworks

**Linguistische Berichte**, 2005 **Copular Sentences in Russian** Asya Pereltsvaig, 2007-04-06 This book provides a detailed study and a novel Minimalist account of copular sentences in Russian focusing on case marking alternations nominative vs instrumental and drawing a distinction between two types of copular sentences On the assumption that Merge is defined in the simplest way possible it is argued that not all syntactic structures are anti-symmetrical One of the copular sentence types is analyzed as a poster child for symmetrical structures while the other type is treated as asymmetrical The originality of this study lies in treating the copula in the two types of copular sentences neither as completely identical nor as two distinct lexical items instead the two types of copula are derived through the process of semantic bleaching Furthermore

it is argued that the two types of the copula need to combine with post copular phrases of different categories It is concluded that Russian draws a distinction between saturated DPs and unsaturated NPs in spite of its renowned lack of overt articles
