Advances in Cryptology - EUROCRYPT '88 Christoph G. Günther,2007-03-06 The International Association for Cryptologic Research 1 4CR organizes two international conferences every year one in Europe and one in the United States. EUROCRYPT '88 held in the beautiful environment of the Swiss mountains in Davos was the sixth European conference. The number of contributions and of participants at the meeting has increased substantially which is an indication of the high interest in cryptography and system security in general. The interest has not only increased but has also further moved towards authentication signatures and other protocols. This is easy to understand in view of the urgent needs for such protocols in particular in connection with open communication systems and in view of the exciting problems in this area. The equally fascinating classical field of secrecy and the theory design and analysis of stream or block ciphers and of public key cryptosystems was however also well represented and several significant results were communicated. The present proceedings contain all contributions which were accepted for presentation. The chapters correspond to the sessions at the conference.
