*The Testing of Materials of Construction* William Cawthorne Unwin, 2015-06-02 Excerpt from The Testing of Materials of Construction A Text Book for the Engineering Laboratory and a Collection of the Results of Experiment The present work is a treatise on the Strength of the Materials used in Construction considered in connection with the instruments and methods by which the mechanical

properties of materials are investigated experimentally The data on which the engineer relies in designing structures cannot be fully understood without some knowledge of the procedure by which they are ascertained Also for several reasons a knowledge of the methods of testing has become of late of greater importance With the introduction of new materials the engineer has been forced to make more use of the testing machine both in estimating a constructional value of materials and to escape the danger of employing material which is unsuitable A considerable advance has been made in the construction of all the apparatus used in testing the operations of testing are carried out with more care and skill Lastly the establishment of

Engineering Laboratories in connection with Schools of Engineering has made experimental investigation an essential part of engineering education The following treatise consists of three parts About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any
