*Lone Star Mind* Ty Cashion, 2018-11-01 There is the story the Lone Star State likes to tell about itself and then there is the reality a Texas past that bears little resemblance to the manly Anglo myth of Texas exceptionalism that maintains a firm grip on the state's historical imagination *Lone Star Mind* takes aim at this traditional narrative holding both academic and lay historians accountable for the ways in which they craft the state's story A clear sighted far reaching work of intellectual history this book marshals a wide array of pertinent scholarship analysis and original ideas to point the way toward a new usable past that twenty first century Texans will find relevant Ty Cashion fixes T R Fehrenbach's *Lone Star A History of Texas and the Texans* in his crosshairs in particular laying bare the conceptual deficiencies of the romantic and mythic narrative the book has served to codify since its first publication in 1968 At the same time Cashion explores the reasons why the collective efforts of university trained scholars have failed to diminish the appeal of the state's iconic popular culture despite the fuller and more accurate record these historians have produced Framing the search for a collective Texan identity in the context of a post Christian age and the end of Anglo male hegemony *Lone Star Mind* illuminates the many historiographical issues besetting the study of American history that will resonate with scholars in other fields as well Cashion proposes that a cultural history approach focusing on the self interests of all Texans is capable of telling a more complete story a story that captures present day realities

Frontier Texas Robert F. Pace, Donald Shaw Frazier, 2004 Tells the epic story of western Texas The

geography of the land made it a natural border between regions of settlement throughout most of its existence. Competing for that borderland for centuries were millions of bison and the nomadic Plains Indians who followed them. Then came the Spanish explorers and then the Americans with their forts, settlements, and cattle. With this mix of competitors, the region's history was one of conflict and survival. *Mexican Politics in the American Era, 1846-1900* Roberto R. Calderón, 1994

**The Far West and the Great Plains in Transition, 1859-1900** Rodman Wilson Paul, 1988 In this book his final work Rodman W Paul explores the settlement of the American West in the latter half of the nineteenth century. Lured by stories of open spaces, fertile farming, their successors on the transcontinental railroads which linked western cities with their eastern counterparts. This comprehensive history describes not only population movement, mining, development, but also banking, farming, ranching, other economic ventures. In a new foreword, Martin Ridge places Paul's history in the context of contemporary scholarship. Paul has given us an authoritative, indeed a brilliant history of the Far West, the Great Plains as he saw it through the lens of miners, businessmen, immigrants. JOURNAL OF AMERICAN HISTORY Rodman W Paul was Professor of History at the California Institute of Technology in Pasadena, the foremost historian of mining in the West. Among his many books are CALIFORNIA GOLD MINING, FRONTIERS OF THE FAR WEST, 1848-1880, THE FRONTIER, THE AMERICAN WEST. Martin Ridge, who originally saw Paul's work through the press, is also a Professor of History at the California Institute of Technology, the author of WESTWARD EXPANSION, A HISTORY OF THE AMERICAN FRONTIER.

**Large Mammal Restoration** David Maehr, Reed F. Noss, Jeffery L. Larkin, 2001-10 Evidence is mounting that top carnivores and other large mammals play a pivotal role in regulating ecosystem health and function, yet those are the species that are most likely to have been eliminated by past human activities. In recent decades, numerous efforts have been undertaken to return some of the species that were previously extirpated on local or regional scales. Large Mammal Restoration brings together for the first time detailed case studies of those efforts from restoring elk in Appalachia to returning bison herds to the Great Plains to the much publicized effort to bring back the gray wolf to Yellowstone National Park. Together, these case studies offer important lessons and new ways of thinking for wildlife managers and conservation biologists involved with restoration programs. Sections examine approaches to determining the feasibility of a restoration program, critical hands-on aspects of restoring large mammals, obtaining public input into the process, and gaining community support for programs. The potential of some species to return without direct human intervention and what can be done to facilitate that natural colonization. An introductory chapter by Reed F. Noss explores some of the reasons for restoring large mammals, as well as some of the ecological and social complications, and a concluding overview by David S. Maehr discusses the evolutionary importance of large mammal restoration. Contributors include Paul C. Paquet, Barbara Dugelby, Steven H. Fritts, Paul R. Krausman, Larry D. Harris, Johnna Roy, and many others. Large Mammal Restoration brings together in a single

volume essential information on the lessons learned from previous efforts providing an invaluable resource for researchers and students of conservation biology and wildlife management as well as for policymakers restoration advocates and others involved with the planning or execution of a restoration program     **Arizona and the West** ,1983     Southwestern
