Text Generation Kathleen McKeown,1992-06-26 Kathleen McKeown explores natural language text and presents a formal analysis of problems in a computer program TEXT *User Modelling in Text Generation* Cecile Paris,2015-12-17 This book addresses the issue of how the user s level of domain knowledge affects interaction with a computer system It demonstrates the feasibility of incorporating a model of user s domain knowledge into a natural language generation system **Lexical Semantics and Knowledge Representation in Multilingual Text Generation** Manfred Stede,2012-12-06 In knowledge based natural language generation issues of formal knowledge representation meet with the linguistic problems of choosing the most appropriate verbalization in a particular situation of utterance Lexical Semantics and Knowledge Representation in Multilingual Text Generation presents a new approach to systematically linking the realms of lexical semantics and knowledge represented in a description logic For language generation from such abstract representations lexicalization is taken as the central step when choosing words that cover the various parts of the content representation the principal decisions on conveying the intended meaning are made A preference mechanism is used to construct the utterance that is best tailored to parameters representing the context Lexical Semantics and Knowledge Representation in Multilingual Text Generation develops the means for systematically deriving a set of paraphrases from the same underlying representation with the emphasis on events and verb meaning Furthermore the same mapping mechanism is used to achieve multilingual generation English and German output are produced in parallel on the basis of an adequate division between language neutral and language specific lexical and grammatical knowledge Lexical Semantics and Knowledge Representation in Multilingual Text Generation provides detailed insights into designing the representations and organizing the generation process Readers with a background in artificial intelligence cognitive science knowledge representation linguistics or natural language processing will find a model of language production that can be adapted to a variety of purposes **Introduction to Python and Large Language Models** Dilyan Grigorov,2024-10-22 Gain a solid foundation for Natural Language Processing NLP and Large Language Models LLMs emphasizing their significance in today s computational world This book is an introductory guide to NLP and LLMs with Python programming The book starts with the basics of NLP and LLMs It covers essential NLP concepts such as text preprocessing feature engineering and sentiment analysis using Python The book offers insights into Python programming covering syntax data types conditionals loops functions and object oriented programming Next it delves deeper into LLMs unraveling their complex components You ll learn about LLM elements including embedding layers feedforward layers recurrent layers and attention mechanisms You ll also explore important topics like tokens token distributions zero shot learning LLM hallucinations and insights into popular LLM architectures such as GPT 4 BERT T5 PALM and others Additionally it covers Python libraries like Hugging Face OpenAI API and Cohere The final chapter bridges theory with practical application offering step by step examples of coded applications for tasks like text

generation summarization language translation question answering systems and chatbots In the end this book will equip you with the knowledge and tools to navigate the dynamic landscape of NLP and LLMs What You ll Learn Understand the basics of Python and the features of Python 3 11 Explore the essentials of NLP and how do they lay the foundations for LLMs Review LLM components Develop basic apps using LLMs and Python Who This Book Is For Data analysts AI and Machine Learning Experts Python developers and Software Development Professionals interested in learning the foundations of NLP LLMs and the processes of building modern LLM applications for various tasks **Big Data** Tianrui Li,Rui Mao,Guoyin Wang,Fei Teng,Lei Zhang,Li Wang,Laizhong Cui,Jie Hu,2022-11-23 This book constitutes the refereed proceedings of the 10th CCF Conference on BigData 2022 which took place in Chengdu China in November 2022 The 8 full papers presented in this volume were carefully reviewed and selected from 28 submissions The topics of accepted papers include theories and methods of data science algorithms and applications of big data *Advanced Applications of Generative AI and Natural Language Processing Models* Obaid, Ahmed J.,Bhushan, Bharat,S., Muthmainnah,Rajest, S. Suman,2023-12-21 The rapid advancements in Artificial Intelligence AI specifically in Natural Language Processing NLP and Generative AI pose a challenge for academic scholars Staying current with the latest techniques and applications in these fields is difficult due to their dynamic nature while the lack of comprehensive resources hinders scholars ability to effectively utilize these technologies Advanced Applications of Generative AI and Natural Language Processing Models offers an effective solution to address these challenges This comprehensive book delves into cutting edge developments in NLP and Generative AI It provides insights into the functioning of these technologies their benefits and associated challenges Targeting students researchers and professionals in AI NLP and computer science this book serves as a vital reference for deepening knowledge of advanced NLP techniques and staying updated on the latest advancements in generative AI By providing real world examples and practical applications scholars can apply their learnings to solve complex problems across various domains Embracing Advanced Applications of Generative AI and Natural Language Processing Modelsequips academic scholars with the necessary knowledge and insights to explore innovative applications and unleash the full potential of generative AI and NLP models for effective problem solving **22nd European Conference on e-Learning** Shawren Singh,Sarah Jane Johnston,2023-10-26 These proceedings represent the work of contributors to the 22nd European Conference on e Learning ECEL 2023 hosted by University of South Africa Pretoria South Africa on 26 27 October 2023 The Conference Co Chairs Associate Professor Sarah Jane Johnston and Associate Professor Shawren Singh both from University of South Africa Pretoria South Africa ECEL is now a well established event on the academic research calendar and now in its 22nd year the key aim remains the opportunity for participants to share ideas and meet the people who hold them The scope of papers will ensure an interesting two days The subjects covered illustrate the wide range of topics that fall into this important and ever growing area of research It is especially relevant that the conference is being hosted by UNISA this year as the university

celebrates its 150th anniversary UNISA has been a pioneer in first distance and now e Learning The conference will also host the final round of the 9th e Learning Excellence Awards where innovate case histories will be presented The opening keynote presentation is given by Professor Thenjiwe Meyiwa Vice Principal for the Research Postgraduate Studies Innovation and Commercialisation at University of South Africa who will speak on The Role of African Feminisms in Shaping a Sustainable Future of Being and Learning An afternoon keynote on Thursday will be made by Dr Zolile Martin Mguda University of South Africa on the topic of ChatGPT The first year The second day of the conference will open with an address by Dr Isabel Tarling MD Limina South Africa with the title Developing Digital Standards for Learning and Teaching in South Africa s Schools With an initial submission of 100 abstracts after the double blind peer review process there are 45 Academic research papers 3 PhD research papers and 1 Masters Research paper published in these Conference Proceedings These papers represent research from Belgium Canada Chile Czech Republic France Germany Ghana Greece Hong Kong Ireland Japan Malaysia Mozambique Norway Oman Per Poland Portugal Romania Singapore South Africa Sri Lanka Sweden Switzerland Turkey and the United Kingdom **IEIS 2022** Menggang Li,Guowei Hua,Xiaowen Fu,Anqiang Huang,Dan Chang,2023-08-04 This proceedings book selects a great deal of research achievements in industrial restructuring strategy industrial organization industrial policy departmental economic research industrial competitiveness regional industrial structure national industrial economic security theory and empirical research and it emphasizes on combining theory with practice With the economic globalization there have been many new phenomena new situations and new challenges in the industries in many countries The proceedings aim to discuss the problems in industrial economics and industrial security theories and practices It is the documentation of the conference 9th International Conference on Industrial Economics System and Industrial Security Engineering Due to the impact of COVID 19 IEIS2022 took place online as a virtual conference *The Linguistic Basis of Text Generation* Laurence Danlos,2009-04-09 This study presents an original and penetrating analysis of the complex problems surrounding the automatic generation of natural language text Laurence Danlos provides a valuable critical review of research in this important and increasingly active field and goes on to describe a theoretical model that is thoroughly grounded in linguistic principles The model emphasises the semantic syntactic and lexical constraints that must be dealt with when establishing a relationship between meaning and form and it is consideration of such linguistic constraints that determines Danlos generation algorithm The book concludes with a description of a generation system based on this algorithm which produces texts in several domains and also a system for the synthesis of spoken messages from semantic representation The book is a significant addition to the literature on text generation and will be of particular interest to all computational linguists and AI researchers who have wrestled with the problem of vocabulary selection **Systemic Text Generation as Problem Solving** Terry Patten,1988 An exploration of a new approach to text generation that interprets systemic grammar as a computational representation Patten demonstrates that systemic grammar can be easily and

automatically translated into current AI knowledge representations and efficiently processed by the same knowledge based techniques currently exploited by expert systems Thus the fundamental methodological problem of interfacing specialized computational representations with equally specialized linguisticrepresentations can be resolved The study provides a detailed discussion of the formal model proposed and of a substantial implementation including a relatively large systemic grammar It represents a fundamental and productive contribution to the literature of text generation   Creation of Hierarchic Text with a Computer Display Wilfred J.
