## **Social Health Insurance Systems In Western Europe:**

*EBOOK: Decentralization in Health Care: Strategies and Outcomes* Richard Saltman, Ana Rico, Wienke Boerma, 2004-09-16

What is the best way to structure primary care services? How can coordination between primary care and other parts of health care systems be improved? How should new technologies be integrated into primary care? There is considerable agreement among national policy makers across Europe that in principle primary care should be the linchpin of a well designed health care system. This agreement however does not carry over into the organizational mechanisms best suited to pursuing or achieving this common objective. Across western central and eastern Europe primary care is delivered through a wide range of institutional financial professional and clinical configurations. This book is a study of the reforms of primary care in Europe as well as their impacts on the broader coordination mechanisms within European health care systems. It also provides suggestions for effective strategies for future improvement in health care system reform.

Primary Care in the Driver's Seat is key reading for students studying health policy, health economics, public policy and management as well as health managers and policy makers.

**The Reshaping of West European Party Politics** Christoffer Green-Pedersen, 2019-07-31 Long gone are the times when class based political parties with extensive membership dominated politics Instead party politics has become issue based Surprisingly few studies have focused on how the issue content of West European party politics has developed over the past decades Empirically Reshaping of West European Party Politics studies party politics in Belgium Denmark France Germany the Netherlands Sweden and the UK from 1980 and onwards This book highlights the more complex party system agenda with the decline but not disappearance of macroeconomic issues as well as the rise in new politics issues together with education and health care Moreover various new politics issues such as immigration the environment and European integration have seen very different trajectories To explain the development of the individual issues this volume develops a new theoretical model labelled the issue incentive model of party system attention The aim of the model is to explain how much attention issues get throughout the party system which is labelled the party system agenda To explain the development of the party system agenda one needs

to focus on the incentives that individual policy issues offer to large mainstream parties i.e. the typical Social Democratic Christian Democratic or Conservative Liberal parties that have dominated West European governments for decades. The core idea of the model is that the incentives that individual policy issues offer to these vote and office seeking parties depend on three factors namely issue characteristics, issue ownership and coalition considerations. The issue incentive model builds on and develops a top down perspective on which the issue content of party politics is determined by the strategic considerations of political parties and their competition with each other.
