The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike. The international coverage is most welcome in this time of intensifying global inequalities. Nancy Jurik, Arizona State University, *The Handbook of Social Problems: A Comparative International Perspective* provides a unique broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world. Editor George Ritzer along with leading U.S. and international sociologists examines the relationship between social problems and a society's level of development and affluence. The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence. Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies. Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies. It is only with affluence that certain things can come to be imagined as social problems such as excessive consumption. The very affluence of a society makes it vulnerable to problems that would not be social problems in poorer societies. The *Handbook* explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies. This theory is clearly illustrated in this volume by the aftermath of September 11, 2001 depicting the vulnerability of the U.S. to social problems in far removed corners of the world. In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems, ecological problems, global inequality, health as a social problem and much more. The *Handbook of Social Problems* is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library. Case studies on financial reporting aspects include one on Romania and one on Turkey. Also included are four case studies on non-financial reporting aspects on Romania, corporate climate change related reporting, Japan disclosure and stock exchanges role in reporting developments. The Future of Work, Employment and Social Protection Peter Auer, Bernard Gazier, 2002 This volume comprises the papers and debates of the second France ILO Symposium on the future of work, employment and social protection. Reflecting the aim of the Symposium itself, the book provides in-depth reflections on work, employment and social protection. Designed to be more than an account of the discussions, this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets, particularly in the developed world. The book discusses the need for more family friendly policies and a more radical policy of equality between the sexes. The legal dimensions of labour market change are also debated and the book explores the positive and negative sides of globalization and its links with technological change.
