**Social Mobility in Industrial Society** Seymour Martin Lipset, Reinhard Bendix, 2018-10-23 Where else but in America captains of industry are fond of saying could a penniless immigrant like Andrew Carnegie achieve so much Any place else that has reached the same stage of industrial development is the answer implicit in Social Mobility The authors conclude somewhat surprisingly that is not noticeably easier to pull oneself up by the bootstraps in the Land of Opportunity than it is in a number of other countries The very process of industrialization with its growing demands for skilled management prevents an elite in any nation from permanently establishing itself in a position of exclusive superiority Even in states where neither political institutions nor official ideologies favor upward mobility increasing industrialization requires a growing and consequently a changing elite class The authors are concerned primarily with mobility in the total population with movements into and out of the working class though they report extensively on the social origins of business leaders in various countries They deal too with the different values of different societies and with the motivation of the socially mobile Solidly based on examination of studies in more than ten languages and of raw data from unpublished works this is the first attempt in thirty years to bring together in one volume what is known of social mobility around the world Here is the first systematic comparison of mobility patterns in such diverse countries as Sweden and Italy Great Britain and Japan a comparison backed by statistics and given added meaning by discussions of the causes and consequences of mobility The authors analyze in detail the political implications of mobility and they explore the relationship between education and mobility Their discussions of factors making for success or failure in school of the role of intelligence in mobility of the effects on children of growing up in various environments and of the varying personalities of the mobile and non mobile bring together the work of both psychologists and sociologists This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1959 [Social Mobility in Industrial Society](#), 2017 In a careful analysis of the existing literature the authors marshal an imposing array of evidence in support of their major argument that social mobility is an integral and continuing aspect of the process of industrialization This classic volume continues to be a basic reference source in the field of occupational mobility Provided by publisher

*Social Mobility in Industrial Societies* Lucienne Portocarero, 1987 Contiene tres estudios comparativos de la movilidad social de la mujer en francia y en suecia analizando el impacto de las diferentes estructuras ocupacionales sobre todo de la division del trabajo por sexos y el grado de discriminacion del mercado de trabajo [The Constant Flux](#) Robert

Erikson, John H. Goldthorpe, 1992 This is a study of social mobility within the developing class structures of modern industrial societies based on a unique data set constructed by Robert Erikson and John Goldthorpe. The focus is on the experience of European nations western and eastern in the period of the long boom following the Second World War but the book also devotes separate chapters to examining the experience of the USA Australia and Japan. The authors combine historical and statistical approaches in their analysis of both trends in mobility and of cross national similarities and differences. They show that wide variation at the level of actually observed mobility coexists with a surprising degree of constancy and commonality in underlying patterns of social fluidity. The empirical results of their study serve as the basis for a critical re-examination of current theories of mobility and for raising more general issues of the proper concerns and methods of comparative macro sociology.

**Social Mobility in Industrial Societies** Raymond Sin-Kwok Wong, 1989 ***Class and Conflict in an Industrial Society*** Ralf Dahrendorf, 2022-01-12

Originally published in England in 1959 this book evolves a new theory of conflict in industrial society. By way of illustrating and testing this theory the book provides detailed analyses of various social phenomena. The author carries out a full critique of Marx in the light of history and modern sociology and discusses the theories of class conflict of James Burnham Fritz Croner and Karl Renner.

***Social Mobility Into Post-industrial Society***

Krzysztof Zagórski (socjologia), 1983 ***Social Stratification*** David B. Grusky, 2018-05-04 The book covers the research on economic inequality including the social construction of racial categories the uneven and stalled gender revolution and the role of new educational forms and institutions in generating both equality and inequality.

***Building European Society***

Andrew Miles, David Vincent, 1993 ***Industrial Culture and Bourgeois Society*** Jürgen Kocka, 1999 Jürgen Kocka is one of the foremost historians of Germany whose work has been devoted to the integration of different genres of the social and economic history of Europe during the period of industrialization. This collection of essays gives a representative sample of his effort to develop by reference to Marx and Weber new and powerful analytical tools for understanding the dynamics of modern industrial societies.

***Social Mobility in a Post Industrial Society*** George Sarossy, 1996 ***The Development of Industrial Societies*** British Sociological Association, 1964 ***Social Mobility in Europe***

Richard Breen, 2004-11-25 Social Mobility in Europe is the most comprehensive study to date of trends in intergenerational social mobility. It uses data from 11 European countries covering the last 30 years of the twentieth century to analyze differences between countries and changes through time. The findings call into question several long standing views about social mobility. We find a growing similarity between countries in their class structures and rates of absolute mobility in other words the countries of Europe are now more alike in their flows between class origins and destinations than they were thirty years ago. However differences between countries in social fluidity that is the relative chances between people of different class origins of being found in given class destinations show no reduction and so there is no evidence supporting theories of modernization which predict such convergence. Our results also contradict the long standing Featherman Jones Hauser hypothesis of a basic similarity in

social fluidity in all industrial societies with a market economy and a nuclear family system There are considerable differences between countries like Israel and Sweden where societal openness is very marked and Italy France and Germany where social fluidity rates are low Similarly there is a substantial difference between for example the Netherlands in the 1970s which was quite closed and in the 1990s when it ranks among the most open societies Mobility tables reflect many underlying processes and this makes it difficult to explain mobility and fluidity or to provide policy prescriptions Nevertheless those countries in which fluidity increased over the last decades of the twentieth century had not only succeeded in reducing class inequalities in educational attainment but had also restricted the degree to which among people with the same level of education class background affected their chances of gaining access to better class destinations
