

Social Practice: Philosophy and Method

The starting premise of this work is that every type of practice profession (e.g. psychotherapy, social work, medicine) requires a method for carrying out its charge effectively. The search for a method, therefore, needs to be taken seriously by those engaged in social practice—with their charge being to improve the functioning of communal or collective life. This book offers a four-stage problem solving model: (1) "precontextualization," characterized by effective commitments to particularistic views of reality and the good society; (2) "contextualization," which aims to arrive at an adequate cognitive understanding of existing social arrangements, thus subjecting to critical scrutiny truth claims made by various stakeholders; (3) "decontextualization," in which the participants step back and assess existing social arrangements according to agreed upon ethical criteria; and (4) "recontextualization," which involves interventions in the existing social order so as to bring it more in line with the moral ideals agreed upon. The four-stage model is applied to concrete cases and compared to existing social problem solving approaches.

Anthony L. Haynor is Associate Professor of Sociology at Seton Hall University. His main scholarly interests include social problem solving and communitarian thought, the development of an integrated human science, and the relationship between Catholic theology and (1) the human sciences and (2) the transhumanist movement.

Epistemology of Modality and Philosophical

Methodology Anand Vaidya, Duško Prelević, 2023-03-21 This book collects original essays on the epistemology of modality and related issues in modal metaphysics and philosophical methodology The contributors utilize both the newer metaphysics first and the more traditional epistemology first approaches to these issues The chapters on modal epistemology mostly focus on the problem of how we can gain knowledge of possibilities which have never been actualized or necessities which are not provable either by logico mathematical reasoning or by linguistic competence alone These issues are closely related to some of the central issues in philosophical methodology notably to what extent is the armchair methodology of philosophy a reliable guide for the formation of beliefs about what is possible and necessary This question also relates to the nature of thought experiments that are extensively used in science and philosophy Epistemology of Modality and Philosophical Methodology will be of interest to researchers and advanced students working on the epistemology and metaphysics of modality as well as those whose work is concerned with philosophical methodology more generally
