This volume of the Applied Social Psychology Annuals is designed to promote closer integration of social psychology and

Stumbling Toward a Social Psychology of Organizations Barry Staw, 2016 I recount some of my early experiences in the field and how they shaped my views about conducting research As I describe it my entry into organizational behavior was not at all seamless requiring a series of adjustments along the way Like many of my colleagues who had moved into the field of organizational behavior I had to find a source of valued added a new perspective or set of alternative ideas to contribute to the field This process of adjustment I fear is no longer so prevalent in the field today Although many social psychologists have migrated to business schools they are still by and large doing social psychological rather than organizational research They often extend social psychological theories to the business context but they rarely seek to reframe and reformulate core organizational issues and problems For this to change I argue that future research needs to become more contextual and phenomenon driven My hope is that with the recent upsurge in talent entering the field we can find a way to harvest more of its creativity moving from the application of social psychology to a genuine social psychology of organizations
