Social Learning Theory And The Explanation Of Crime:

Social Learning Theory and the Explanation of Crime Ronald L. Akers, Gary F. Jensen, 2011-12-31 Social learning theory has been called the dominant theory of crime and delinquency in the United States yet it is often misrepresented. This latest volume in the distinguished *Advances in Criminological Theory* series explores the impact of this theory. Some equate it with differential association theory. Others depict it as little more than a micro level appendage to cultural deviance theories. There have been earlier attempts to clarify the theory's unique features in comparison to other theories and others have applied it to broader issues. These efforts are extended in this volume which focuses on developing, applying, and testing the theory on a variety of criminal and delinquent behavior. It applies the theory to treatment and prevention, moving social learning into a global context for the twenty first century. This comprehensive volume includes the latest work, tests, and theoretical advances in social learning theory and will be particularly helpful to criminologists, sociologists, and psychologists. It may also be of interest to those concerned with current issues relating to delinquency, drug use, abuse, and drinking alcohol abuse.

Social Learning and Social Structure

Ronald L. Akers,2011-12-31 The social learning theory of crime integrates Edwin H Sutherland's differential association theory with behavioral learning theory. It is a widely accepted and applied approaches to criminal and deviant behavior. However it is also widely misinterpreted, misstated, and misapplied. This is the first single volume in depth authoritative discussion of the background concepts development, modifications and empirical tests of social learning theory. Akers begins with a personal account of Sutherland's involvement in criminology and the origins of his influential perspective. He then traces the intellectual history of Sutherland's theory as well as social learning theory providing a comprehensive explanation of how each theory approaches illegal behavior. Akers reviews research on various correlates and predictors of crime and delinquency that may be used as operational measures of differential association, reinforcement and other social learning concepts. Akers proposes a new integrated theory of social learning and social structure that links group differences in crime to individual conduct. He concludes with a cogent discussion of the implications of social learning theory for criminology and public policy.
