Library,1949      **Manufacturing Knowledge** Richard Gillespie,1993-05-28 What motivates workers to work harder What can management do to create a contented and productive workforce Discussion of these questions would be incomplete without reference to the Hawthorne experiments one of the most famous pieces of research ever conducted in the social and behavioral sciences Drawing on the original records of the experiments and the personal papers of the researchers Richard Gillespie has reconstructed the intellectual and political dynamics of the experiments as they evolved from the tentative experimentation to seemingly authoritative publications Manufacturing Knowledge raises fundamental questions about the nature of scientific knowledge and about the assumptions and evidence that underlay debates on worker productivity      *The Lancet* ,1944-10      **The SAGE Encyclopedia of Industrial and Organizational Psychology** Steven G. Rogelberg,2016-09-27

The well received first edition of the Encyclopedia of Industrial and Organizational Psychology 2007 2 vols established itself in the academic library market as a landmark reference that presents a thorough overview of this cross disciplinary field for students researchers and professionals in the areas of psychology business management and human resources Nearly ten years later SAGE presents a thorough revision that both updates current entries and expands the overall coverage adding approximately 200 new articles expanding from two volumes to four Examining key themes and topics from within this dynamic and expanding field of psychology this work offers a truly cross cultural and global perspective      *Industrial and labor relations review* ,1954

Swamidass,2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and

competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field     *Subject Catalog* J.
