Social Psychology Of Race Relations:

The Social Psychology of Race Relations Leonard Bloom,1971 **The Social Psychology of Minorities** ,1978-12-01 Us and Them why do some groups feel superior to others Why is it that all too often the inferior group accepts the evaluation of their status by the superior group What happens when an inferior group decides to challenge the superior group and how do they go about it Can a minority group seek to achieve equal treatment from the majority society but also retain their separate identity The Social Psychology of Minorities seeks to answer these important questions which are of vital relevance to understanding the social realities of people s lives and particularly to the mechanics of prejudice and discrimination Written by Henri Tajfel former Professor of Social Psychology at Bristol University this succinct analysis discusses such concepts as the internal and external criteria of a minority group the effects of social change and the process and patterns of rejection and acceptance An important report on a subject which helps to shape the relationship between minority groups and the majority society The Social Psychology of Minorities will be especially useful to those concerned with social science education and the achievement of good community relations Psychology and Race Peter Watson,2017-09-05 Since the problems of race relations are worldwide the international origins and perspectives of this excellent and timely book are especially advantageous More research has been done in the United States than elsewhere on the psychology of race relations so it is appropriate that a plurality of the chapters of this book are by American authors a stellar group that includes leading contributors to our contemporary knowledge of the topic Contributors from the English speaking Commonwealth countries are next in number followed by authors from the United Kingdom where race related issues have only recently become a salient concern of politics and social ethics The editor has assigned topics to his carefully chosen author experts not by country or region but by matching the expertise of each author against a need for coherent analysis of the important aspects of aepsychology and race Psychology and Race is divided into two major parts The first half of the book looks at the interracial situation itself The first section concentrates on the majority or dominant group and describes the development and measurement of racial awareness and prejudice and techniques for reducing prejudice the second section focuses on the reactions of subordinate or minority groups and the third deals with specific aspects of interpersonal interaction attitudes behavior and performance when the people concerned are of different races The book also looks at those areas of life where race is relevant and where psychology can help in an understanding of the situation The scope of this volume the distinction of its authors and the hardheaded sense of reality it brings to the discussion of these extremely complex issues will make it an invaluable resource not only for teachers and students but also for everyone concerned in any way with this most pressing issue of our times Handbook of Psychology: Personality and social psychology Irving B. Institute of Race Relations, Institute of Race Relations. Library, 1981 *Television History, the Peabody Archive, and Cultural Memory* Ethan Thompson, Jeffrey P. Jones, Lucas Hatlen, 2019 *Television History The Peabody Archive and Cultural Memory* is the product of a multiyear collaboration between the Peabody Awards program and over a dozen media scholars with the intent to uncover, explore, and analyze historical television programming contained in the Peabody Awards archives at the University of Georgia. It is an intentional effort to look both wider and deeper than the well known canon of U.S. broadcast history that dominates popular memory of the relationship of television to American society. The Peabody Archive is especially suited to this project because it is an archive of programming produced and submitted not just by the big networks in New York or Los Angeles but by stations and media producers across the nation and more recently around the world. This project asks how might these programs change our understanding of television's past and impact the ways we think about television's present and future. What new questions can we ask and what new approaches should we take as a result of seeing and experiencing this programming? The contributions in this volume offer a dramatic range of approaches for how scholars can productively engage the archive's media and physical holdings to examine and reconsider television history.
