Social Psychology Of Social Movements:

The Psychology of Social Movements ,1941 Cantril uses the technique of phenomenological analysis to straighten out the tangle of mental contest and motivation found in the individual who is adjusting to the social world He notes that the principles of some social movements are wrong those of others are more nearly right Some are cruel illusions accepted by bewildered people who follow false prophets others uncompromisingly base policies on assumptions which the psychologist knows are untrue some would completely prohibit the search for an understanding of man and his social world some unnecessarily destroy the capacity and talent of man in obtaining his objectives

The Social Psychology of Social Movements (Psychology Revivals)

Hans Toch,2013-11-26 The social movements that Professor Toch examines in this book originally published in 1966 range from the Black Muslims to food faddists and the founders of these movements range from Hitler to Joan of Arc Why do people join social movements How do such movements serve the needs of their members and what unique social problems do they cause What are the typical consequences of membership What gives rise to social movements and how can we evaluate them In *The Social Psychology of Social Movements* Hans Toch provides answers to these questions It is impossible to avoid in a study of this sort the universal human implications of social movements the latent tragedy and despair which involvement in such collective action implies The humour adversity and pathos is equally evident in many of the examples which Professor Toch describes But he provides a sympathetic objectivity and is at pains to provide a systematic psychological survey of large ideologically orientated groups and their members in general
