Social Psychology of Helping Relations Arie

Nadler,2020-01-29 Examines the major aspects of giving and receiving help in interpersonal and intergroup relations This

unique book extends the traditional emphasis on interpersonal help giving in order to consider a wider spectrum of interpersonal and intergroup helping relations Help giving is viewed as reflecting people's care for others while at the same time dependency on help and giving help imply lower and higher places on the social hierarchy respectively It studies the

psychology of what goes into helping someone and integrates experimental work conducted in the social psychological laboratory with applied research from volunteer organizations schools and work and family environments In addition to

research on the giving of help the book considers the recipient of help and reviews research and theory on people's readiness to seek and receive help Unlike much of past research in this context that has been interested in the generosity question i e

whether or not people help others the book considers how different kinds of assistance i e autonomy and dependency

oriented help shape helping interactions It then goes beyond the analyses of the immediate helping interaction to consider the long term consequences of giving and receiving help Finally the book addresses theory and research on intergroup

helping relations Social Psychology of Helping Relations Solidarity and Hierarchy begins with a general introduction to the topic It then offers a series of broad perspectives covering the philosophical and psychological theory evolution and overview

of social psychological research Next the book looks at the social psychology of helping relations examining the parties involved and the why behind their actions The positives and negatives of giving and receiving assistance and the links

between status and interpersonal and intergroup helping relations are also covered It considers how giving seeking and

receiving help maintains or challenges status relations between individuals and groups. The book finishes with a conclusion that wraps up the many lessons learned. Looks at solidarity and inequality in social interactions. Examines why people are ready to give and receive help. Studies the consequences of giving and receiving help. Highlights important implications to different kinds of help beyond the dichotomy between giving/receiving help or not. Addresses research and theory on interpersonal and intergroup helping relations. The implications of helping relations for personal and social change. *Social Psychology of Helping Relations: Solidarity and Hierarchy* is an ideal book for advanced students, researchers and individuals interested in social psychology, counselling, social work, Sociology and Political Science.
