*The Social Role of Higher Education* Ken Kempner, William G Tierney, 2018-10-10 Originally published in 1996 The Social Role of Higher Education is an anthology of nine papers it presents cases studies showing how culture influences the social role of higher education in various nations It examines how environments get defined and how they shape universities and how knowledge and academic work interact in national contexts This book focuses on how both developed and developing countries systems of higher education are affected by their own culture and their place within the larger global context

*Rethinking Universities* Sally Baker, Brian J. Brown, 2007-09-14 Most people who work and study in universities will be aware that they are changing Yet few have so far grasped the extent of this change or have attempted to put it in a coherent intellectual framework This volume provides new ways to understand how the university workforce in developed nations is being encouraged to change itself and how the social role of these institutions has shifted from places of higher learning toward being agents for social change and the promotion of human welfare Moreover the demands that are being placed on institutions and the kinds of graduates they are required to produce has changed too with the emphasis on a new brand of vocationalism and a reinvigorated focus on skills and employability This volume provides a theoretically informed philosophically sophisticated account of what universities in developed nations are being encouraged to do and the impact this has on their staff students and the societies of which they are a part

Internationalisation of African Higher Education Chika Sehoole, Jane Knight, 2013-10-30 The role of higher education especially the international dimension is given little importance in the discourse on achieving the Millennium Development Goals MDGs in Africa This book aims to change that The potential of higher education s contribution to Africa s development remains unrealized and often misunderstood In today s globalised world which prioritises economic growth through liberalised trade and competitive market strategies much emphasis has been placed on higher education s ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy While these are important contributions the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent It is against this background that the African Network for the Internationalisation of Education ANIE undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs Through empirical research seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women s empowerment combating HIV AIDS and establishing global partnerships for development through academic mobility joint research initiatives curriculum innovation and policy development
