Daniel Garrison Brinton

Social Self:

The Social Self in Zen and American Pragmatism Steve Odin, 1996-01-10 The thesis of this work is that in both modern Japanese philosophy and American pragmatism there has been a paradigm shift from a monological concept of self as an isolated I to a dialogical concept of the social self as an I Thou relation including a communication model of self as an individual society interaction It is also shown that for both traditions all aesthetic moral and religious values are a function of the social self arising through communicative interaction between the individual and society However at the same time this work critically examines major ideological conflicts arising between the social self theories of modern Japanese philosophy and American pragmatism with respect to such problems as individualism versus collectivism freedom versus determinism liberalism versus communitarianism and relativism versus objectivism

The Psychophysiology of Self-awareness Alan Fogel, 2009-08-25 The practice and science of feeling our movements sensations and emotions Embodied self awareness is the practice and science of our ability to feel our movements sensations and emotions As infants before we can speak or conceptualize we learn to move toward what makes us feel good and away from what makes us feel bad Our ability to continue to develop and cultivate awareness of such body based feelings and understanding is essential for learning how to successfully navigate in the physical and social world as well as for avoiding injury and stress Embodied self awareness is made possible by neuromotor and neurohormonal pathways between the brain and the rest of the body pathways that serve the function of using information about body state to maintain optimal health and well being When these pathways become compromised primarily as a result of physical injury or psychological stress and trauma we lose our ability to monitor and regulate our basic body functions This book explains the neurological basis of embodied self awareness how to enhance self awareness and how to regain it after injury or trauma
