Therapeutic

Culture Jonathan B. Imber, For nearly half a century social scientists have made claims that there is a therapeutic ethos with extensive influence upon numerous aspects of American society. In Therapeutic Culture twelve authors address the implications of this ethos and its effects on a wide range of social institutions extending from the family to schools and operating in religious behavior and within the legal system. Has there been as the sociological theorist Philip Rieff argued in 1966 a triumph of the therapeutic? If so in what kinds of institutions has it been most pervasive? At the same time what aspects of modern culture has it replaced or defeated? Therapeutic Culture addresses these questions and raises others. Part 1 of this volume examines the emergence of the idea of authenticity as it defines the manipulation of emotions and behavior both in the United States and Great Britain. Contributors include Elisabeth Lasch Quinn Frank Furedi Jonathan B. Imber and Alan Woolfolk. Part 2 illustrates specific cases of the effects of therapeutic culture within institutions including courts schools religious communities and the virtual community of the Internet. Contributors include James L. Nolan Jr. John Steadman Rice Felicia Wu Song and James Tucker. Part 3 extends the analyses of specific social institutions to the broader consequences that have resulted as a therapeutic ethos has taken root in contemporary life. Contributors include Digby Anderson Ellen Herman and James Davison Hunter. Part 4 is devoted to a previously unpublished essay by Philip Rieff whose significant influence can be seen in many of the contributions. Rieff revisits the highly controversial confirmation hearings of Supreme Court Associate Justice Clarence Thomas in 1991 and offers ample evidence of the therapeutic uses of politics as well as the political manipulations available within a therapeutic culture to provide a fitting conclusion. This volume establishes a benchmark for further theoretical reflection and empirical research on the nature of therapeutic culture. It will be of interest to sociologists psychologists political scientists and cultural studies specialists. Jonathan B. Imber is editor in chief of Society and Class of 1949 Professor in Ethics and professor of sociology at Wellesley College

Lone Motherhood in Twentieth-Century

Britain, 1998-05-07 During the 1990s lone mothers reached the top of the political agenda viewed as both a drain on public expenditure and a moral threat. What has been missing from the debate is an understanding of how we have got to where we are. This timely new study by three leading experts in the field sets out first to investigate the demographics of lone

motherhood how the pathways into lone motherhood have changed and whether the changes of the last quarter of a century are as dramatic as they appear Second it looks at the wider context for the changes in lone motherhood in terms of ideas about marriage and the changes in the construction of the never married mother from victim in the 1950s to parasite in the late 1980s Finally it examines the way in which policies have defined the problem of lone motherhood over time and the way in which lone mothers have been treated with regard to housing social security and employment The study concludes that there is little possibility of putting the genie back in the bottle in terms of reducing the number of lone mothers efforts to do so by reducing public expenditure on them may be effective but at the expense of the children involved Instead the authors urge policy makers to change focus again and pay more attention to investing in children
