*Social Work Practice* Bloomsbury Publishing,1996-03-30 Pardeck demonstrates that the ecological approach to social work practice stresses effective intervention and that effective intervention occurs through not only working with individuals but also with the familial social and cultural factors that impact their social functioning. The power of the ecological approach through focusing on multiple factors for assessment and intervention is that it integrates empirically based theories from various fields including social work psychology sociology and anthropology. Pardeck provides an orientation to the role of social work practitioners within the human services. He differentiates the unique contributions of social work and explains them in terms of the needs and goals of an ecological approach to practice. An ecological approach to practice stresses that effective social work intervention occurs through not only working with individuals but also with the familial social and cultural factors that impact their social functioning. The power of the ecological approach through focusing on multiple

factors for assessment and intervention is that it integrates empirically based theories from various fields including social work psychology and anthropology. The book represents an effort to define the goals, commitments, and approaches that have emerged out of the history of social work and to relate them to similar concepts and values that are central to an ecological approach to practice. Three pervasive and unifying themes run through the book. One is the constant commitment to goals of facilitating human development. Pardeck suggests this is a central ethic that defines and distinguishes an ecological approach to social work practice. The second theme is an affirmation of the basic utility of a systems approach in conceptualizing and intervening in human needs, concerns, and problems. The ecological perspective views human beings as social organisms engaged in patterns of relationships that nurture or inhibit this basic humanity. The third theme is an interactionist view of the importance of person-environment fit as a central dynamic in human functioning. The traditional intra-psychic aspects of human behavior have tended to obscure the immense importance of both nurturing and potentially damaging forces at work in the social environment. This volume will be of considerable interest to social work educators and practitioners as well as their research libraries.

*Foundations of Social Work Practice in the Field of Aging* Roberta Rubin Greene, 2007. The aging of societies is a global phenomenon. In the United States alone the life expectancy for both men and women will continue to increase over the next few decades and with that a population explosion of older adults. The dramatic increase in the number and diversity of older adults elevates the visibility of gerontological matters. As a result social work practice is becoming more multigenerational thereby demanding social workers regardless of their professional endeavors to be equipped with the most innovative theories and practices to serve older adults and their families. This comprehensive text spans the new knowledge and skills required in direct practice areas, group work, and macro practice. It also outlines the Geriatric Social Work Competencies as developed by social work

educators necessary to serve the older adult population and suggests how these competencies can be integrated into foundation curriculum. Social work educators, students, practitioners, administrators, and policymakers will find updated useful information in this text regarding assessment tools, cultural influences, evidence based practices, intervention techniques, theoretical examples. Individuals are living longer and healthier lives in part because of the extraordinary growth of biomedical knowledge and public health initiatives. The confluence of the rapid and large increase of the older population and the exponential increase in the dissemination of knowledge create an imperative for social workers to employ the most recent
